Card holders requiring a lockwasher and flat washer shall include configuration identifier “F” or “W” in the PIN (see table I).

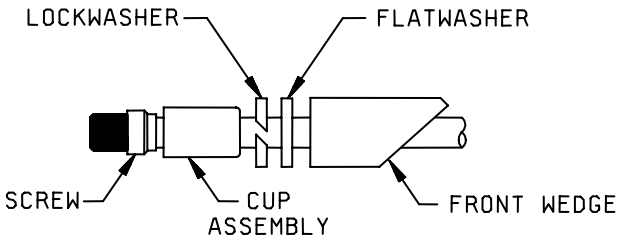

FIGURE 4. Lockwasher and flat washer details.

Screw self-locking element (see figure 5). The use of a screw self-locking element will provide prevailing torque for resistance to loosening from shock vibration. Card holders requiring a screw self-locking element shall include configuration identifier “L” or “N” in the PIN (see table I).

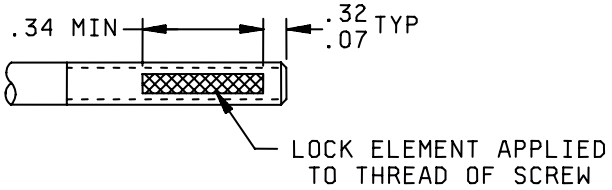

FIGURE 5. Screw self-locking element details.

Lockwasher, flat washer, and screw self-locking element. Card holders requiring a lockwasher, flat washer, and screw self-locking element option shall include configuration identifier ”D” or “J” in the PIN (see table I).
