COMMERCIAL ITEM DESCRIPTION

RODS SET, LEVEL

The General Services Administration has authorized the use of this commercial item description in preference to Military Specification MIL-R-10916.

This commerical item description covers rods set, level (in pairs) intended for use in obtaining precise vertical control of 2nd order accuracy.

Salient characteristics:

Design: The rods shall be furnished in pairs, three meters long, non-folding, with invar strip, centimeter reading, two separate sets of graduation lines, double scale, spring mounted. The rods shall include:

a. Bulls-eye level.
b. Two foot or ground plates.
c. Two rod stands with adjustable struts.
d. Wooden transport case or cases.
e. Handles for carrying.

Frame material: Rod frames shall be of corrosion-resistant aluminum alloy or wood, and shall be treated with a suitable coating to enchance the corrosion and deterioration resistance in any operating or storage environment.

Type II. Metric graduations.

Class A - erect reading.
Class B - inverted reading.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practical.

Packaging and marking. Military packaging shall be specified when shipments are to overseas Department of Defense (DOD) consignees. Commercial packaging may be specified for shipments to DOD consignees within the Continental United States and to non-DOD consignees worldwide. When a supplier's normal packaging will satisfy the requirements for military packaging, it may be used.

Military packaging. Each level rod shall be preserved and packed to protect against physical damage and deterioration in a logistic environment characterized by the following:

AMSC N/A FSC 6675
DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

1. Multiple handling during transportation and intransit storage.
2. Shock, vibration, and static loading forces during worldwide shipment by all transport modes.
3. Uncontrolled warehouse storage for extended periods.
4. Weather exposure during shipment and intransit transfers.
5. Stacking loads during shipment and storage.

Quantities of level rods of one style destined to a single addressee may be unitized into one or more unit loads.

Commercial. Each level rod shall be packaged in accordance with the supplier's normal method for retail distribution. Level rods of one style shipped to a single destination may be unitized to permit handling as a single unit. Shipping containers shall comply with Uniform Freight Classification or National Motor Freight Classification rules.

Marking. Unit, intermediate (when provided), and exterior packs shall be marked with the item nomenclature, stock or part number, quantity per pack, an contract number as a minimum. Additional marking shall be as specified in the contract or purchase order. Exterior packs shall have in addition the complete consignee's address. Markings shall be applied in a legible manner, in a contrasting color, of an appropriate size, and of waterproof materials.

Quality assurance. The rods shall be examined for the following defects. Presence of one or more defects shall be cause for rejection.

1. The design is not as specified.
2. Equipment missing or not as specified.
3. Material not as specified.
4. Metric graduations not as specified.
5. Packaging and marking not as specified.

Certification of commercial item. The contractor shall certify that the product offered to the Government meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product as the manufacturer's current product offered by the contractor in the commercial marketplace for at least one year preceding the solicitation. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Small business. A small business that cannot meet the certification-of-commercial-item requirement of this document, may make an offer under this solicitation; and, if such small business is the apparent successful offeror, the Government may require the small business to submit a sample rod sets, level. Any such rod may be evaluated for this solicitation if time to contract award permits. Such evaluation would be to determine conformance to all requirements of this commercial item description and to determine equivalency to rod set, level

available in the commercial marketplace in the areas of durability, human factors engineering, and safety. It should be noted that samples are not required unless specifically requested by the contracting officer. Note. The Government may elect not to evaluate a sample from an apparent low bidder for award for this solicitation if a determination of urgency is made by the contracting officer. The sample would then be evaluated prior to future solicitation for comparable items.

Notes:

1. Ordering activity shall specify erect or inverted reading.
2. These commercial rods are not certified by the Bureau of Standards.
3. When this commercial item description is used for procurement, the certification clause must appear in the solicitation.
