COMMERCIAL ITEM DESCRIPTION

SURVEYOR'S TOOL POUCH

The General Services Administration has authorized the use of this commercial item description in preference to Military Specification MIL-S-52420.

This description covers a leather pouch to carry some topographic equipment and accessories.

Salient characteristics.

Design: The surveyor's tool pouch shall have a tapered holster to carry a 10-16 ounce plumb bob, wide pocket for standard field book, a pocket for six foot folding rule, an open end side pocket for carrying a minimum of 10 marking arrows, a pocket to carry a crayon, a pocket to carry a marker, and a front snap lid pocket to carry nails and/or tacks.

The pouch shall either be equipped with an attached belt that can be adjusted to fit at least 24 through 42 inch waist lines without the use of tools, or be equipped with provisions for attaching the pouch to a belt which is one to four inches wide without the use of tools.

Material. The pouch shall be fabricated of top grain saddle leather.

Regulatory requirements. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the minimum extent practicable.

Packaging and marking. Military packaging shall be specified when shipments are to overseas Department of Defense (DoD) consignees. Commercial packaging may be specified for shipments to DoD consignees within the continental United States and to non-DoD consignees worldwide. When a suppliers' normal packaging will satisfy the requirements for military packaging, it may be used.

Military packaging. Each tool pouch shall be preserved in accordance with the appropriate method of MIL-P-116 (specified in the contract or order). The pouch shall be packed in a wooden box, with blocking and bracing, suitable for overseas shipment that will protect against physical damage deterioration in a logistic environment characterized by the following:

1. Multiple handling during transportation and in-transit storage.
2. Shock, vibration, and static loading forces during worldwide shipment.
3. Uncontrolled warehouse storage for extended periods.
4. Weather exposure during shipment and in-transit transfers.
5. Stacking loads during shipment and storage.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and other data which may improve this document should be sent by letter to: Commander, US Army Belvoir Research, Development and Engineering Center, ATTN: STRBE-TSE, Fort Belvoir, VA 22060-5606.

AMSC N/A FSC 5210

DISTRIBUTION STATEMENT A. Approved for public release, distribution is unlimited.

Check the source to verify that this is the current version before use.

Quantities of tool pouch destined to a single addressee may be unitized into one or more unit loads.

Commercial. Each tool pouch shall be packaged in accordance with contractor's normal method for retail distribution. Surveyor's tool pouch shipped to a single destination may be unitized to permit handling as a single unit. Shipping containers shall comply with the Uniform Freight Classification or National Motor Freight Classification rules.

Military marking. Marking shall be in accordance with MIL-STD-129. For the purpose of marking, the level of preservation and packing shall be A/A.

Commercial marking. Unit, intermediate (when provided) and exterior pack shall be marked with the item nomenclature, stock or part number, quantity per pack, and contract or package order. Exterior pack shall have in addition the complete consignee's address. Marking shall be applied in a legible manner, in a contrasting color, of an appropriate size, and of waterproof material.

Quality assurance. The surveyor's tool pouch shall be examined for the following defects. Presence of one or more defects shall be cause for rejection.

1. Design not as specified.
2. Material not as specified.
3. Packaging and marking not as specified.

Certification of commercial item. The contractor shall certify that the product offered to the Government meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, manufacturer's current product offered by the contractor in the commercial marketplace for at least one year preceding the solicitation. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Small business. A small business that cannot meet the certification-of-commercial-item requirement of this document, may make an offer under this solicitation; and, if such small business is the apparent successful offeror, the Government may require the small business to submit a sample tool pouch. Any such tool pouch may be evaluated for this solicitation if time to contract award permits. Such evaluation would be to determine conformance to all requirements of this commercial item description and to determine equivalency to tool pouch available in the commercial marketplace in the areas of durability, human factors engineering, and safety. It should be noted that samples are not required unless specifically requested by the contracting officer. Note. The Government may elect not to evaluate a sample from an apparent low offeror for award for the solicitation if a determination of urgency is made by the contracting officer. The sample would then be evaluated prior to future solicitation for comparable items.
