TIER I ADOPTION NOTICE

ISO/IEC/IEEE 12207-2017, “Systems and software engineering – Software life cycle processes”, was adopted on May 15, 2024, for use by the Department of Defense (DoD). Proposed changes by DoD activities must be submitted to the DoD Adopting Activity at OUSD(R&E), Systems Engineering and Architecture, Deputy Director, SE Policy and Guidance, 4800 Mark Center Drive, Suite 16F09-02, Alexandria, VA 22308.

This standard provides a defined set of processes to facilitate communication among acquirers, suppliers, and other stakeholders in the life cycle of a software system. The standard applies to the full life cycle of software systems, products, and services, including conception, development, production, utilization, support, and retirement, and to their acquisition and supply, whether performed internally or externally to an organization. The life cycle processes of this document can be applied concurrently, iteratively, and recursively to a software system and incrementally to its elements.

The standard also provides processes that can be employed for defining, controlling, and improving software life cycle processes within an organization or a project. The processes, activities, and tasks of this document can also be applied during the acquisition of a system that contains software, either alone or in conjunction with ISO/IEC/IEEE 15288-2023, Systems and software engineering—System life cycle processes.

ISO/IEC/IEEE 12207-2017 was prepared by Joint Technical Committee ISO/IEC JTC 1, Information Technology Subcommittee SC 7, Systems and Software Engineering, in cooperation with the IEEE Computer Society Systems and Software Engineering Standards Committee, under the Partner Standards Development Organization cooperation agreement between ISO and IEEE.
