TIER I ADOPTION NOTICE

ISO/IEC/IEEE 24748-7:2025, “Systems and software engineering – Life cycle management – Part 7: Application of systems engineering on defense programs”, was adopted on August 20, 2026, for use by the Department of War (DoW).

The standard was approved by IEEE in 2025 and published in 2026. The IEEE dates the standard as approved in 2025; ISO and IEC list the standard as published in 2026. Both versions are equivalent.

ISO/IEC/IEEE 24748-7:2025 provides defense-specific guidance for implementing the systems life cycle processes defined in ISO/IEC/IEEE 15288:2023 throughout the acquisition, development, operation, modernization, and sustainment of military systems. The standard tailors the generic systems engineering framework of ISO/IEC/IEEE 15288:2023 to the unique needs of defense agencies by defining defense-specific terminology, expected work products, and systems engineering activities applicable to government organizations, contractors, integrators, maintainers, and sustainment organizations. It supports the entire defense acquisition life cycle while allowing programs to tailor processes to meet mission, program, and contractual requirements.

The standard emphasizes disciplined technical management through integrated application of agreement processes, technical processes, technical management processes, organizational project-enabling processes, and specialty engineering disciplines. It defines the expected outputs and attributes of systems engineering activities, promotes consistent acquirer–supplier relationships, and supports objective technical decision-making through requirements management, architecture development, risk management, verification, validation, configuration management, and life cycle reviews. By establishing a common systems engineering framework for defense programs, the standard improves interoperability, reduces technical and programmatic risk, and enhances the successful delivery and long-term sustainment of complex defense capabilities.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, Information technology, Subcommittee SC 7, Software and systems engineering, in cooperation with the Systems and Software Engineering Standards Committee of the IEEE Computer Society, under the Partner Standards Development Organization cooperation agreement between ISO and IEEE

Proposed changes by DoW activities should be submitted to the DoD Adopting Activity via email at osd.pentagon.ousd-r-e.mbx.sea@mail.mil, and include Attn: Policy & Workforce in the subject line. Alternatively, correspondence may be addressed to OUSW(R&E), Systems Engineering and Architecture, SE Policy and Guidance, 4800 Mark Center Drive, Suite 16F0902, Alexandria, VA 22308.

Area: SESS

DISTRIBUTION STATEMENT A. Approved for public release: Distribution in unlimited

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T15:55Z
Check the source to verify that this is the current version before use.

Custodians:
OUSW(R&E) SE
Army – AM
Navy – AS
Air Force – 19

Adopting Activity:
OUSW(R&E) SE
(Project SESS-2026-027)

Review Activities:
Army – AC, AR, AV, CR, MI, PT, TE, TM, SY
Navy – CG, CH, MC, OS, SH
Air Force – 01, 08, 10, 11, 16, 24, 33, 94
DLA – CC, DH
OSD – SO
DISA – DC1, DC5
Other – MDA, NS, USTC
