MILITARY SPECIFICATION

BEARINGS, FIBER REINFORCED PLASTIC, SLEEVE, PLAIN AND FLANGED, SELF-LUBRICATING; GENERAL SPECIFICATION FOR

This amendment forms a part of Military Specification MIL-B-85560 dated 15 August 1983, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 3

Add the following paragraph after para. 3.2,

"3.2.3 Product Manufacture - Except for the winding, bonding and curing operations, the manufacturer is permitted to sub-contract manufacturing operations without violating the requirements of 3.2.2. The winding, bonding and curing operations shall be performed in the plant listed on the Qualified Products List. The manufacturer may subcontract the winding process provided that (1) Process Specifications to control the winding process are established by the manufacturer and are imposed upon the subcontractor; and (2) the qualifying activity is notified during the qualification process of the subcontractor performing the winding process. Manufacture of the self-lubricating liner material may also be subcontracted. Any change in (1) the liner manufacturer, (2) the liner manufacturing procedures, or (3) the materials used in manufacture of the liner will require requalification to an extent determined by the qualifying activity."

PAGE 4

Para. 3.5.4.2, line 6, delete "two pounds per inch minimum." and substitute "1.5 pounds per inch minimum."
