COMMERCIAL ITEM DESCRIPTION

SKIMMER, KITCHEN

The General Services Administration has authorized the use of this commercial item description for all Federal agencies.

1. SCOPE

1.1 Scope. This commercial item description (cid) covers a stainless steel kitchen skimmer.

2. SALIENT CHARACTERISTICS

2.1 Material. The skimmer shall be formed from stainless steel conforming to a type 300 or 400 series in accordance with ASTM A 167, A 176 or A 276.

2.2 Construction. The skimmer shall be in general conformance with figure 1.

2.2.1 Body. The body shall be constructed from a single piece of stainless steel sheet. The body of the skimmer shall measure 6-1/8 inches (15.6 cm), +1/4, -9/16 inch (+6.4, -14.3 mm), in diameter and have a minimum thickness of 0.033 inch (0.8 mm). The center of the body shall have a minimum bowl (depression) of 3/8 inch (9.5 mm). The bowl shall have a minimum of 32 holes with a diameter of 1/8 inch (3.2 mm) minimum to 1/4 inch (6.4 mm) maximum. The hole size shall be consistent on each skimmer.

2.2.2 Handle. The handle of the skimmer shall measure 11-3/4 inches (29.8 cm) minimum in length, 9/16 inch (1.4 cm) minimum in width, and have a minimum thickness of 0.090 inch (2.3 mm). The angle between the vertical axis of the body and handle shall be 40 degrees, ±5 degrees. The handle shall have a curved hook of 7/8 inch (2.2 cm) minimum length. The handle shall be attached to the body with a continuous lap weld or a minimum of two spot welds provided the spot weld joint area is sealed around the edge.

2.3 Finish. The skimmer shall have a No. 3 or better finish as defined by the American Iron and Steel Institute's Handbook, "Finishes for Stainless Steel".

2.4 Marking. The skimmer shall be marked with the manufacturer's name, trade name, or trademark of such known character that the source may be readily determined.

2.5 Workmanship. The skimmer shall be clean and free from dirt, rough or sharp edges, slivers, burrs, deep scratches, tool marks, or other defects which may affect appearance or serviceability.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor St., Fort Worth, TX 76102

Distribution Statement A: Approved for public release; distribution is unlimited.

2.6 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within tolerances specified and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

2.7 Standard commercial product. The skimmer shall, as a minimum, be in accordance with the requirements of this CID and shall be the manufacturer's standard commercial product. A standard commercial product is a product which has been sold or is currently offered for sale on the commercial market through advertisements, manufacturer's catalogs, or brochures, and represents the latest production model.

3. REGULATORY REQUIREMENTS

3.1 NSF International compliance. The contractor shall submit to the contracting officer or authorized representative, prior to awarding of contract, satisfactory evidence that the items offered meet the requirements of NSF International Criteria C-2 or Standard No. 2. Satisfactory evidence of this compliance may be any of the following:

(1) Listing in the current edition of the "NSF International Listing Food Service Equipment and Related Products, Components and Materials", and display of the NSF International mark on the finished item; or

(2) Certification issued by NSF International under their special contract evaluation/certification program for government contracts; or

(3) Certified test report from a recognized independent testing laboratory acceptable to the medical authority of the service for which the item(s) are being procured stating that the item has been tested and conforms to NSF International Criteria C-2 or Standard No. 2.

3.2 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS

4.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards, and quality assurance practices and be the same product offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

5. PACKAGING

5.1 Preservation, packing, and marking. Preservation, packing, and marking shall be as specified in the contract or order.

6. NOTES

6.1 Sources of non-Government association documents.

American Iron and Steel Institute handbooks are available from the Committee of Stainless Steel Producers, American Iron and Steel Institute, 1000 16th Street, N.W., Washington, DC 20036.
