COMMERCIAL ITEM DESCRIPTION
PENCILS, MECHANICAL FOR .5 & .7 MM LEADS
(DUAL ACTION)

This Commercial Item Description is approved by the Commissioner, Federal Supply Service, General Services Administration for use by all federal agencies.

1. **Scope:** This Commercial Item Description covers mechanical pencils which accommodate .5 and .7 mm refillable lead sizes with replaceable and retractable erasers.

2. **Salient Characteristics:**

2.1 Mechanical pencils shall consist of a barrel which contains a lead holding (clutch) mechanism, spare lead chamber, metal pocket clip, replaceable eraser in accordance with commercial item description A-A-132, and retractable sleeve (sliding).

2.2 Mechanical pencils shall operate by push action to propel the lead in short, uniform increments to a usable length from the point, and shall operate smoothly and easily, without binding, bending, breaking or other malfunctions.

2.3 Lead holding mechanism (clutch) shall grip the lead firmly, without breaking so that leads do not turn or slip into or out of the pencil. The pencil shall be capable of dispensing the specified lead.

2.4 Leads shall not fall free from the mechanical pencil when the push button is depressed such that the lead when reduced to a length of as small as 16 mm (.63 inches), with sleeve extended, will continue to be retained in the device.

2.5 Spare leads shall feed automatically as the lead is used. Each pencil shall be furnished with a minimum of three leads of H or HB hardness. The leads shall be 60 mm ± 2 mm (2.4 inches ± .08 inches) long.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to General Services Administration, Federal Supply Service, Engineering Branch, 26 Federal Plaza, New York, NY 10278.

2.6 Workmanship. Mechanical pencils shall be securely assembled so that parts do not become loose or displaced and shall be free from defects which may adversely affect appearance, serviceability or performance.

3. Regulatory Requirements:

The offerer/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. Quality Assurance Requirements:

4.1 Contractor Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4.2 Examination and Testing.

4.2.1 Suppliers are encouraged to use quality control (QC) techniques that exhibit control over their processes (e.g. (Statistical Process Control) SPC techniques) as defined in American National Standards Institute (ANSI) Z1.1, Z1.2 and Z1.3/ American Society for Quality Control (ASQC) B.1, B.2 and B.3 that systematically reduce excess variations. If used, objective evidence shall be available that demonstrates overall measurement adequacy techniques and controls. These techniques shall ensure quality levels equal to, or greater than, those cited in applicable technical documents or, herein.

4.2.2 End item inspection may be used by the offeror or the Government representative, as a means to determine the effectiveness of the in process quality controls. While in process controls shall not be substituted for end item performance testing,they may be used for visual and dimensional sampling.

4.2.3 For those characteristics for which there are no such controls, or for end item performance test, lot by lot sampling for inspection/test shall be required. The sample unit shall be one pencil. Sampling shall be in accordance with the American National Standards Institute (ANSI)/ American Society for Quality Control (ASQC) Z1.4, Sampling Procedures and Tables for Inspection by Attributes.

4.2.4 An inspection lot shall consist of all like items submitted for inspection at one time. The inspection level for visual and dimensional defects shall be S-3 with an AQL of 4.0 percent defective. The supplier must provide objective evidence (tests and inspection records) that the presented material meets the requirements of the sampling plan as indicated above.

5. Packaging:

5.1 Preservation, packing, and marking shall be specified in the contract or order.

6. Notes:

6.1 Applicable Documents. Issues of the following documents, in effect on the date of invitation for bids or request for proposal form a part of this document to the extent specified herein.

6.1.1 Federal Acquisition Regulation (FAR) may be obtained from the Superintendent of Documents, Government Printing Office, Washington. DC 20402.

6.1.2 Application for copies of (ANSI) Z1.1, Z1.2 and Z1.3 and (ASQC) B.1, B.2 and B.3 may be obtained from the American Society for Quality Control. PO Box 3005, 611 E. Wisconsin Avenue, Milwaukee, WI 53201-4606.

6.2 National Stock Number Listing (NSN). The following is a list of NSN's assigned which corredpond to this CID. The list may not be indicative of all possible NSN's associated with the CID.
