MATERIAL: Shaker shall be made of sheet steel in accordance with ASTM A505 and other materials as required for satisfactory operation.

Finish shall be acid-resistant paint.

DESIGN: The design of the shaker shall produce variable speed shaking action and simulate the snap of the wrist for creating a swirling effect within the vessel.

Agitation shall be controlled by an adjustable lever which is graduated from 1 to 10 for reproducible speed settings. A built-in timer shall automatically stop the shaker at any interval up to 55 minutes, or be set for continuous operation.

The shaker sidearm shafts shall hold from 4 to 8 bottles, flasks or other type of glassware. Clamps shall be supplied for attaching glassware to sidearm shafts as standard equipment.

Shaker shall be powered by a 115V, 60 Hz AC constant-speed motor, which supplies full torque to the oscillating mechanism regardless of the speed setting. Oscillator and motor shall be completely enclosed in a steel sheet metal housing.

All electrical components shall conform to the standards of Underwriters Laboratories, Incorporated.

NOTES:
1. Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.
2. Referenced documents shall be of the issue in effect on date of invitations for bid.
3. FSCM: 08455, 22527, and 91290.

APPROVED 8 NOV 1983 REVISED

USER ACTIVITIES: ARMY - DM, MD
NAVY - MS

REVIEWER ACTIVITIES: ARMY - ME
AIR FORCE - 82

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
