COMMERCIAL ITEM DESCRIPTION

BIN, INGREDIENT, MOBILE, 250 LB. CAPACITY

The General Services Administration has authorized the use of this Commercial Item Description in preference to Size 2 of Military Specification MIL-B-43386B.

Intended use.

The mobile ingredient bin is intended for use in dining facilities for storage and transporting of dry bulk, meats, and liquids.

Salient characteristics.

Construction and materials. The ingredient bin shall be fabricated with or without seams from stainless steel having a minimum thickness of 0.0375 inch. When applicable, seams shall be continuous, smooth, and blend in with bin body. The bin when completely filled with water shall not leak. The bin shall not have any rough and sharp edges, burrs, slivers, or scratches and shall be free from rough grind, die, or trimming marks, rust or scale. The cover shall be fabricated from one piece of stainless steel having a minimum thickness of 0.0375 inch. The cover shall fit and slide properly without falling off the bin. When closed, the cover shall completely enclose the bin opening. The front top portion of the bin shall have a plate where a product identification card or label can be inserted. The bottom of the bin shall be reinforced for caster mounting. When bolts, nuts, or other fasteners are used they shall be drawn up tightly.

Sanitation. The complete bin including cover and casters shall comply with the requirements of the National Sanitation Foundation Standard No. 2.

Dimensions. The bin with cover shall not exceed the following dimensions:

Overall Height	30 inches
Overall Length	29 inches
Overall Width	25 inches

Capacity. The bin shall have a minimum holding capacity equivalent to any of the following:

37 gallons
5 cubic feet
250 pounds of granulated sugar

FSC 7320

Casters. The bin shall have four casters attached to the body. Casters shall be 4 inches in diameter with a minimum load rating of 100 pounds each. The tread shall be polyurethane, natural rubber, synthetic rubber, or a combination thereof.

Bumper. A perimeter bumper shall be firmly attached and sealed to the bin body at a height of 11 inches ± 1 inch. The bumper shall be fabricated from rubber or rubberlike material and protrude 1 ± 1/4 inch maximum beyond the bin body.

Certification. The contractor shall certify that the product offered meets the salient characteristics of the description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices, and is the same as the product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract. Evidence of NSF Certification shall be accomplished in one of the following: Listed in the current edition of the NSF "Listing of Food Service Equipment" or display the NSF seal on the finished bin, or a certification issued by NSF under their special one-time contract certification, or a certified test report by an independent testing laboratory.

Packaging.

A. Packaging. The mobile ingredient bin shall be preserved and packaged in accordance with commercial practice.

B. Packing. Packing shall be in accordance with commercial packing complying with Uniform Freight Classification and National Motor Freight Classification, as applicable.

C. Marking. Commercial markings are acceptable, provided the following information is included:

National Stock Number	Date of Pack
Item description	Contract Number
Quantity	Name, address and zip code of manufacturer
