COMMERCIAL ITEM DESCRIPTION

FILTERS, COOKING GREASE

The General Services Adminstration has authorized the use of this Commercial Item Description.

Salient Characteristics.

Description. The filter shall be designed to filter liquefied frying medium used in deep fat fryers and doughnut machines. The filter assembly shall consist of a filter cone and a filter cone holder. The filter cone shall be made of 100 percent pure cotton, capable of withstanding cooking grease temperatures up to 400°F and shall be properly sized to fit in the holder. The filter shall retain particles 10 microns (0.01mm) and larger and be capable of filtering a minimum of 30 pounds of cooking medium. Five hundred filters shall be supplied with each cooking grease filter assembly. The filter cone holder shall be fabricated from stainless steel or nickel plated wire and be designed to rest on metal receptables or pots, with diameters ranging from 10 inches to 17 inches, without tipping.

Standard Compliance: The cooking grease filters shall comply with the National Sanitation Foundation Standard No. 4.

Certification.

The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producers' own drawings, specifications, standards and quality assurance practices and is the same product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered Materials. Manufacturers are encouraged to utilize recovered materials to the maximum extent practicable.

Packaging.

A. Packaging. The cooking grease filters shall be preserved and packaged in accordance with commercial practice.

B. Packing. Packing shall be in accordance with commercial packing complying with Uniform Freight Classification and National Motor Freight Classification, as applicable.
