COMMERCIAL ITEM DESCRIPTION

LINER, BOWL, INCINERATING TOILET

The General Services Administration has authorized the use of this Commercial Item Description.

This description covers bowl liners for incinerating toilets.

1. SALIENT CHARACTERISTICS

A) Construction. Bowl liners shall be made from paper laminated with polyethylene. Liners shall be folded to fit the bowls of Research Products incinerating toilets, Models TR and MT.

B) Dimensions. When completely unfolded, the overall length of each liner shall be not less than 457 mm (18 inches) and the overall width shall be not less than 305 mm (12 inches).

B) Workmanship. Bowl liners shall be free from holes, tears, or other defects which may impair serviceability.

2. QUALITY ASSURANCE:

A) Responsibility for Inspection. Unless otherwise specified in the contract, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the Commercial Item Description where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

FSC 8105

Check the source to verify that this is the current version before use.

B) Sampling. Bowl liners and shipping containers shall be sampled in accordance with MIL-STD-105, as indicated below, for the cited examinations.

C) Examination of liners for Construction, Dimensions, and Workmanship. The lot size shall be expressed in liners. The sample unit shall be 1 bowl liner. The Inspection Level shall be S-2; the AQL shall be 4.0 percent defective.

D) Examination of Packaging, Packing, Marking and Palletization. The lot size shall be expressed in units of issue for Packaging, Packing, and Marking; and pallets for palletization. The sample unit shall be 1 fully prepared shipping container or pallet, as applicable. The Inspection Level shall be S-2, the AQL shall be 4.0 percent defective.

3. REGULATORY REQUIREMENTS:

The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580, as amended, to the maximum extent practicable.

4. PACKAGING, PACKING, AND MARKING:

A) Packaging/Packing. Two hundred (200) liners shall be packaged in a dispenser type box in accordance with normal commercial practice and packed to assure acceptance by common carrier and to provide product protection against loss or damage during multiple shipments, handling and storage. The shipping container shall be in compliance with the National Motor Freight Classification and the Uniform Freight Classification.

B) Marking. For civilian destinations - in accordance with FED-STD-123. For military destinations - in accordance with MIL-STD-129. Bar code marking shall be included for both civilian and military destinations.
