COMMERCIAL ITEM DESCRIPTION
CRAYON, MARKING,

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification SS-C-661 which has been cancelled.

This commercial item description covers genuine and processed soapstone soapstone crayons intended primarily for marking metals, fabrics, woods, and ceramics.

1. Salient Characteristics

A. Marking crayons shall be cut from genuine untreated soapstone (steatite) or processed soapstone cut of white talc and suitable binding materials. The crayon shall be of uniform strength and free from foreign matter.

B. The crayon shall be rectangular in cross section; both ends may be cut at 90 degrees with respect to two adjacent sides, or one end may be so cut and the other end sharpened to a chisel edge, with the taper not to exceed 1/2 inch in length.

C. The crayon shall be able to write satisfactorily on fabric, dry and bare wood and ceramic surfaces.

D. The minimum dimensions of the crayon shall be 5 inches X 1/2 inch X 3/16 inch.

Workmanship. The crayons shall be composed of material that is free from any defect that may affect its performance or use.

2. Test

Breaking Strength Test. Place one crayon perpendicular across two horizontal parallel rods 1/4 inch in diameter and 2-1/2 inches apart center to center. Using a 1/4 inch diameter rod, the test load shall be applied in a vertical direction at the midpoint of the chalk and through the 3/16 inch deep section. Gradually apply and increase test load up to 3 pounds and maintain maximum load for 30 seconds. The chalk shall be of sufficient hardness to withstand the breaking strength test without breaking up to and including the maximum weight of 3 pounds.

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited

3. Quality Assurance

Responsibility for Inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the Commercial Item Description, where such inspections are deemed necessary to assure that supplies and services conform to the prescribed requirements (See Section 7, Ordering Data).

Each lot of crayons shall be inspected for conformance to the requirements herein. Sampling for inspection shall be in accordance with MIL-STD-105 using the plans specified below.

A. Sampling for visual examination - Inspection Level S-4 with an Acceptable Quality Level (AQL) of 4.0 percent defective. The sample unit shall be one crayon.

B. Sampling for dimensional examination - Inspection Level S-2 with an Acceptable Quality Level (AQL) of 4.0 percent defective. The sample unit shall be one crayon.

C. Sampling for end item testing - Inspection Level S-2 with an Acceptable Quality Level (AQL) of 2.5 percent defective. The sample unit shall be one crayon.

D. Packaging, Packing, and Marking - Inspection Level S-2 with an AQL of 4.0 percent defective. The sample unit shall be one fully prepared shipping container.

4. Preparation for delivery

Packaging, packing and marking shall be as specified in the contract or purchase order.

5. Application for copies of technical documents referenced herein:
The issue date in effect on date of invitation for bids or request for proposal shall be apply.

MIL-STD-105 is available from Standardization Documents Order Desk; Building 4D; 700 Robbins Avenue; Philadelphia, PA 19111-5094.

Public Law 94-580, Resource Conservation and Recovery Act, is part of U.S. Code, Title 42. Available from the Congressional Sales Office, U.S. Government Printing Office, Washington, D.C. 20402.

6. Regulatory Requirements

The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.
