COMMERCIAL ITEM DESCRIPTION

DISPENSER, GUMMED TAPE, ELECTRICALLY OPERATED (DUAL PRESET)

The General Services Administration, Office Supplies and Paper Products Commodity Center, New York, NY 10278, has authorized the use of this Commercial Item Description in lieu of Federal Specification GG-D-1958, which has been canceled.

This description covers electrically operated tape dispensers which are used for dispensing reinforced or gummed paper tape that requires water activation for adhesion.

1. SALIENT CHARACTERISTICS:

Tape Dispensers shall:

A. Have two length selection devices so that two lengths can be preset as desired. At a minimum, length selection settings shall be at 2-inch increments. In addition to the 2-inch increments, other length selection settings shall be acceptable.

B. Dispense tape lengths of between 6 and 70 inches (minimum range) and 6 and 84 inches (maximum range).

C. Have the capability to automatically measure, feed, moisten, dispense, and cut either of the two preset lengths.

D. Dispense tape at a speed of at least 3 feet per second.

E. Accommodate a tape roll at least 1-1/2 to 3-1/32 inches wide with an outer tape roll diameter of at least 7-1/2 inches. Due to tape variations, the dispenser shall be capable of dispensing tape with various core sizes. The tape shall not bind against any part of the dispenser when tested in accordance with paragraph 4.C.3.

Distribution Statement A:
Approved for public release; distribution is unlimited.

FSC 7520

Check the source to verify that this is the current version before use.

F. Moisten the tape by brush or brushes using water that is stored in a visible, nonshatterable, refillable plastic container with a minimum capacity of 16 ounces.

G. Maintain the water at a commercially acceptable temperature by a built-in or top heater and thermostat. The amount of water applied shall be regulated in accordance with commercial practice.

H. Meet the requirements of either UL 114 or UL 1950. The label or listing based on the re-examination service of the Underwriters' Laboratories, Inc. shall be accepted as evidence that the dispenser conforms to applicable requirements.

H. Have feet or a base that will not mar work surfaces (e.g. wood, glass or metal) and provide lateral stability.

I. Come complete with operating and servicing instructions.

J. Be marked in a legible and permanent manner with the manufacturer's name and/or trademark.

Workmanship: Except for the cutting edge of the blade, the tape dispenser shall be free of sharp edges. The tape dispenser shall also be free of any defects which will adversely affect appearance, impair serviceability, or which might constitute a personal hazard to the user, including, but not limited to, superfluous coating of any kind, burrs, scratches, niches, dents, blisters, crinkling, imbedded foreign matter, or discoloration. Any fasteners or pins used in the assembly shall be set in accordance with normal commercial practice, including, but not limited to, exhibiting a firmly tightened, flush seating. The tape dispenser shall not exhibit evidence of deformity, including, but not limited to cracking, bending, loosened parts, warping, or visible stress marks, after testing as prescribed in paragraph 4.C.3.

Corrosion Resistance: Except for the actual cutting edge of the blade, all metal parts shall be resistant to corrosion. Individual parts shall be either corrosion resistant stainless steel or anodized, plated, finished with baked enamel, subjected to a bluing process, or whatever is commercially appropriate for the specific function of the part. The contractor shall provide a manufacturer's chemical certification of corrosion resistance upon request by the Government.

2. APPLICABLE DOCUMENTS AND DOCUMENT SOURCES: The following documents form a part of this Commercial Item Description to the extent specified herein. Unless otherwise indicated, the issue in effect on the date of invitation for bids or request for proposal shall apply:

Federal Standard:

Fed. Std. No. 123, Marking for Domestic Shipment (Civil Agencies)

Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, Handbooks, and Commercial Item Descriptions (CIDs), as outlined under General Information in the Index of Federal Specifications, Standards and Commercial Item Descriptions. The Index, which includes cumulative bimonthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402.

Single copies of this Commercial Item Description, or other Commercial Item Descriptions required by activities outside the Federal Government for bidding purposes are available without charge from General Services Administration Business Service Centers in Boston; New York; Philadelphia; Washington, D. C.; Atlanta; Chicago; Kansas City, MO; For Worth; Houston; Denver; Los Angeles; San Francisco; and Auburn, WA.

Military Standards:

MIL-STD-105, Sampling Procedures and Tables for Inspection by Attributes

MIL-STD-129, Marking for Shipment and Storage

Copies of Military Specifications and Standards required by contractors in connection with specific procurement functions should be obtained from the Standardization Documents Order Desk; Building 4D; 700 Robbins Avenue; Philadelphia, PA 19111-5094; or as directed by the contracting officer.

Industry Standards:

UL 114, Office Appliances and Business Equipment

UL 1950, Safety of Information Technology Equipment Including Electrical Business Equipment

Copies of UL standards are available from Underwriters' Laboratories (UL), Inc., 333 Pfingsten Road, Northbrook, IL 60062.

Public Law:

Public Law 94-580, Resource Conservation and Recovery Act, is part of U. S. Code, Title 42. Copies of the U. S. Code may be obtained through the Congressional Sales Office, U. S. Government Printing Office, Washington, D. C. 20402.

3. **REGULATORY REQUIREMENT:** The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

4. **QUALITY ASSURANCE:**

A. **Responsibility for Inspection:** Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all the inspection requirements of this CID. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the Commercial Item Description, where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements (See Section 6, Ordering Data).

B. **Sampling:** All sampling shall be performed in accordance with MIL-STD-105.

(1) **Sampling for Visual Inspection.** A random sample of tape dispensers shall be taken from each lot. The inspection level shall be S-3 with an Acceptable Quality Level (AQL) of 4.0 percent defective. The sample unit shall be one tape dispenser.

(2) **Sampling for Dimensional Inspection.** A random sample of tape dispensers shall be taken from each lot. The inspection level shall be S-3 with an AQL of 4.0 percent defective. The sample unit shall be one tape dispenser.

(3) **Sampling for Tests.** A random sample of tape dispensers shall be taken from each lot. The inspection level shall be S-1 with an AQL of 4.0 percent defective. The sample unit shall be one tape dispenser.

(4) **Sampling for Preparation for Delivery.** For examination of the preparation for delivery. The sample unit shall be one shipping container fully prepared for delivery, selected at random. The inspection level shall be S-2 with an AQL of 4.0 percent defective.

Testing and Materials, 1916 Race St., Philadelphia, PA 19103)

C. **Inspections.**

(1) **Visual Examination.** Samples taken in accordance with paragraph 4.B.1 shall be examined to verify that the superficial product characteristics are in compliance with Section 1.

(2) **Dimensional Examination.** Samples taken in accordance with paragraph 4.B.2 shall be examined to verify that all dimensionally measurable product requirements are in compliance with Section 1.

(3) **Tests.** Samples taken in accordance with paragraph 4.B.3 shall be subjected to the following tests to demonstrate consistency in product functionality, durability, and performance expectations. The below tests shall be performed only at the beginning of the contract (before the first shipment), and after a design change that affects any functional aspect of the tape dispenser.

(a) **Performance Test.**

Place in the dispenser, an appropriate commercially used tape, 3 inches wide (± 1/32) and a roll diameter of 7 inches (± 1/2 inch). The dispenser shall be operated for 2.5 seconds on a random length setting. The total amount of tape dispensed shall be a minimum of 90 inches long. For dispensers without a random length setting, the longest length shall be dispensed and the time recorded. Tape shall dispense at no less than 36 inches per second. Evaluate test against paragraphs 1.D and 1.E.

(b) **Length Selection Test.**

Immediately following the performance test, the same dispenser shall be set for two different measured lengths and two lengths of tape shall be dispensed for each measured length in alternate order. Tape length shall be accurate plus/minus (±) 1/2 inch. Evaluate test against paragraph 1.C.

(4) **Examination for Preparation for Delivery.** Samples taken in accordance with paragraph 4.B.4 shall be examined to determined compliance with Section 5.

5. PREPARATION FOR DELIVERY.

A. Packaging and Packing Provisions. Each tape dispenser shall be packaged to prevent damage during multiple shipments, handling, and storage. Packaged tape dispensers shall be packed in accordance with normal commercial practice. The packing container shall be closed to prevent accidental opening and shall be such to insure carrier acceptable and safe delivery to destination, complying with the rules and regulations applicable to the mode of transportation to be used.

B. Marking.

(1) For Shipment to Civilian Agencies. In addition to any special marking required by contract or order, marking shall be in accordance with Fed. Std. No. 123. Bar Code marking is required, unless otherwise specified (See Section 6).

(2) For Shipment to Military Activities. In addition to any special marking required by contract or order, marking shall be in accordance with MIL-STD-129. Bar Code marking is required, unless otherwise specified (See Section 6).

6. ORDERING DATA: Purchasers should select the preferred options permitted herein, and include the following information in procurement documents:

(A) Title, number, and date of this Commercial Item Description.

(B) Arrangement for inspections and inspection facilities, if different than provisions under Quality Assurance.

(C) Special packaging and packing, if different than provisions in Packaging and Packing.

(D) Special marking, if different than provisions in Marking.

(E) Specify, only if Bar Code marking is not required.

MILITARY INTEREST:

NONE: DoD has no registered interest in revisions and amendments to this Commercial Item Description until further notice.
