MIL-A-46106A
AMENDMENT-2
11 February 1974
SUPERSEDING
Amendment-1
23 March 1972

MILITARY SPECIFICATION

ADHESIVE-SEALANTS, SILICONE, RTV, GENERAL-PURPOSE

This amendment forms a part of Military Specification MIL-A-46106A, dated 18 September 1970, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 1

Title, line 2: Delete "(For Electrical and Mechanical Sealing)"

PAGE 7

3.4, end of paragraph: Add "(f) Each label or tag attached to the containers of silicone compound shall contain application instructions as follows:

'Application. These one-component adhesive-sealants require moisture from the air to cure. When they are used the following are required"

(a) Good ventilation during cure.
(b) Full cure before enclosure (7 days minimum for thicknesses over 1/8 inch, and 14 days minimum for thicknesses over 1/4 inch).
(c) Sufficient moisture to complete cure.
(d) Maximum thickness of 1/2 inch.
(e) Maximum glueline of 1 inch when used between non-porous substrates.'"

PAGE 10

4.5.1.1, line 4: Delete "Dupanol WAW" and substitute "Dupanol WAQ".

PAGE 20

5.3, end of paragraph: Add

"WARNING: This compound may cause slight corrosion to various metals. (See label or tag attached to each container.)"

PAGE 21

6.1.1, end of paragraph: Add "Materials meeting this specification utilize atmospheric moisture and liberate acetic acid during cure. This condition has been known to cause slight corrosion of various metals. It has also been shown that this type material can cause fracture of stressed high strength steel when applied under high relative himidity conditions. These factors should be thoroughly investigated prior to the use of these materials. Particular care should be taken if these materials are proposed for use in electrical equipment, especially when in close proximity to small gauge wire and electrical contacts."

PAGE 23

6.6, line 1: Delete "Dupanol WAW. Dupanol WAW" and substitute "Dupanol WAQ. Dupanol WAQ".
