COMMERCIAL ITEM DESCRIPTION

PAD BED LINEN PROTECTIVE (reusable)

The General Services Administration has authorized the use of this commercial item description.

This commercial item description describes an absorbent, reusable bed linen protective pad which provides protection from excretions encountered in patient care.

Salient characteristics. Pad bed linen protective shall consist of at least 3 layers. The facing layer shall be approximately six ounces per square yard of 80 percent cotton and 20 percent polyester. The pad shall have one or more soaker layers to trap and hold moisture away from the body. Soaker layers shall wick moisture into the pad and inhibit its return to the surface. Moisture shall be evenly distributed throughout the pad; and a barrier layer shall prevent moisture penetration to the bed linens. The top layers shall be quilted. All four edges shall be seamed and finished or bound. The pad shall not pucker at the edges nor shall the material gather, bunch, ball or slip The pad shall absorb a minimum of 1500 ml. when tested in accordance with paragraph 5.4 ASTM standard D1117-80. The pads shall retain their absorbency and structure after a minimum of 150 wash cycles and shall not wrinkle as a result of laundering. Finished size of the pad shall be as follows:

Size 1 - 30 inches by 36 inches, plus or minus 1 inch (91 cm by 76 cm plus or minus 2.54 cm). Pad shall weigh not less than 13 ounces (368 grams)

Size 2 - 36 inches by 36 inches, plus or minus 1 inch (91 cm by 91 cm plus or minus 2.54 cm). Pad shall weigh not less than 20 ounces (567 grams).

Workmanship. The pad, bed linen shall be free from defects which detract from its appearance or impair its serviceability.

Unit. The units shall appear in the VA solicitation

Quality Assurance Provisions.

Responsibility for inspection Unless otherwise specified in the contract of purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the government. The government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government, upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with this commercial item description requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and an inspection level of S-1. The unit of product for examination purposes shall be one pad, bed linen protective, reusable as specified in this description.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical
