SUPERSEDING
MIL-E-53126(ME)
20 April 1992

DETAIL SPECIFICATION SHEET
POWER DISTRIBUTION, ILLUMINATION SYSTEMS, ELECTRICAL
UNIVERSAL ADAPTER

This specification is approved for use within US Army Research Development and Engineering Command, Communications and Electronics Research and Development Center, Product Realization Directorate, Department of the Army and is available for use by all Departments and Agencies of the Department of Defense.

The requirement for acquiring the product described herein shall consist of this specification sheet and MIL-DTL-53126.

1 SCOPE

1.1 Scope. This specification sheet covers the detail requirements for the Power Distribution Illumination Systems Electrical (PDISE), Type VI, model: Universal Adapter, NSN: 5975-01-247-4791.

2 APPLICABLE DOCUMENTS

2.1 Drawings. The following Government drawings form a part of this specification sheet to the extent specified herein. Unless otherwise specified, the issues are those cited in the solicitation.

DRAWING#	NOMENCLATURE	DRAWING #	NOMENCLATURE
CECOM & PM-MEP Drawings - Cage Code: 97403 and 30554			
13227E6201	Special Universal Adapter 40/60 Amp, 3 Phase	13227E6208	Connector Assembly, Special Universal Adapter
13208E5820	Terminal, Load		

AMSC N/A FSC 6150

Distribution Statement A. Approved for public release, distribution is unlimited.

(Copies of drawings required by contractors in connection with specific acquisition functions should be obtained from: PROJECT MANAGER-MOBILE ELECTRIC POWER, 5850 Delafield Road, Bldg 324 FT BELVOIR VA 22060-5809.)

3 REQUIREMENTS

3.1 Requirements. The Universal Adapter, Type VI, PDISE shall be a self-contained, free-standing, man portable unit. The adapter shall connect electrical equipment without military standard connectors to the electrical power distribution equipment, as specified herein. The Universal Adapter consists of a box with a 5-pin, 3-phase 40/60 amp input connector and five terminals. The box includes an insulated wrench for tightening/loosening the terminals.

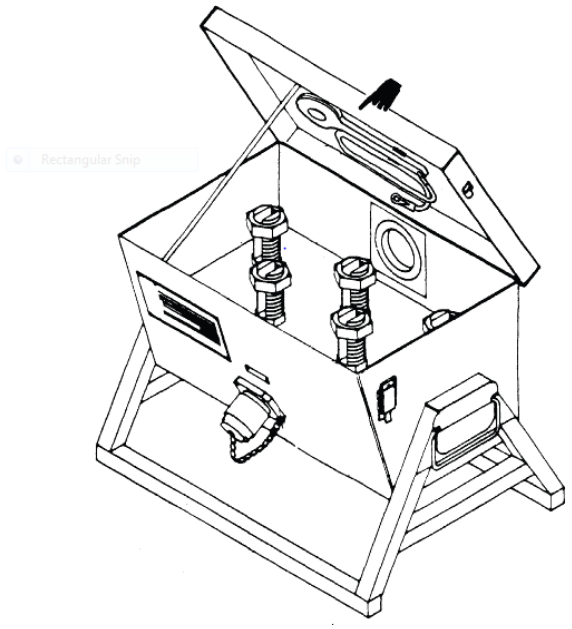

Figure 1. Universal Adapter

3.2 Design. The Universal Adapter shall be IAW TA13227E6201 and as specified herein.

3.2.1 Dimensions. The Universal Adapter shall not be greater than the following dimensions:

Length (Inches)	Width (Inches)	Height (Inches)
21.00	16.00	16.50

3.2.2 Weight. The Universal Adapter shall weigh no more than 20 pounds.

3.2.3 Universal Adapter inputs. The Universal Adapter shall have a three phase input capable of handling 60 A/P.

3.2.3.1 Input Connector. The Universal Adapter shall have a 60 ampere, three phase, male, input receptacle IAW 13227E6208.

Check the source to verify that this is the current version before use.

3.2.4 Universal Adapter PDISE outputs The Universal Adapter shall have 5 output terminals IAW 13208E5820.

3.2.5 This specification sheet had no superseding “base”. The original publication of this specification was a performance specification that was used in-house by CR4. Since this specification is now a detailed military specification, this specification sheet is deemed necessary to capture the unique characteristics desired in the end item.

3.2.6 Changes from previous issues: Marginal notations are not used in this revision to identify changes with respect to the previous issue because this detail specification sheet although a part of the base document, was not published because it was a document with limited circulation and coordination that was used essentially by CR4.
