MIL-C-22442/6
10 August 1990

MILITARY SPECIFICATION SHEET

CABLE ASSEMBLY, RADIO FREQUENCY (AIRCRAFT AUDIO)
QUALIFICATION BY SIMILARITY

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The complete requirements for procuring the cables described herein shall consist of this document and the latest issue of specification MIL-C-22442.

REQUIREMENTS

1. Cables furnished under this specification may be qualified by similarity as specified herein.

2. Table I lists the components used throughout the specification and is furnished for information only. The Government takes no responsibility for the accuracy of this list.

3. Requirement 3. This specification sheet contains a matrix with each of the cable assembly specification sheets listed by rows, and the components used to produce these cable assemblies listed by column across the top (see table I). To determine similarity, choose two or more cable assembly specification sheet numbers from the rows and highlight the rows. Each box that contains a dot indicates the components used in that cable assembly (see examples Table II). Next, highlight the columns associated with each dot that was highlighted in the previous step. All specification sheets that have all their corresponding components (dots) highlighted from the two previous steps are considered as subsets of the originally highlighted rows, and will be considered for qualification by similarity if requested in the letter forwarding samples for qualification.

NOTES:

1. Tables II and III are included as examples. Table II depicts an example where a manufacturer has been approved for listing on the Qualified Products List (QPL) for two cable assemblies (light horizontal shading) and is therefore qualified by similarity for an additional five cable assemblies (dark horizontal shading). Table III depicts an example where the manufacturer has been approved for listing on the QPL for three cable assemblies and is therefore qualified by similarity for seven additional cable assemblies.
