COMMERCIAL ITEM DESCRIPTION

CREAMER, NONDAIRY, FOR RECONSTITUTION

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description.

This Commercial Item Description (CID) covers nondairy creamer for reconstitution, packed in commercially acceptable containers, suitable for use by the Federal Government.

Salient characteristics.

The nondairy creamer for reconstitution shall be an instant nondairy creamer formulated and dried especially for reconstitution and use in liquid form.

Dry product: The dry product shall have a white to light cream color. It shall be free flowing, have a uniform granular size, and be free from lumps that do not break up under slight pressure.

The nondairy creamer for reconstitution shall not contain noticeable brown and/or black scorched particles. It shall contain no foreign material such as dirt, insects, insect parts, wood, paint, glass, or metal particles.

Titanium dioxide shall not be used.

Beneficial comments, recommendations, additions, deletions, clarifications, etc., and any data which may improve this document should be sent to: Head, Food Quality Assurance Staff, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Room 2506, South Building, P.O. Box 96456, Washington, DC 20090-6456.

FSC 8940

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Reconstituted product: When reconstituted correctly, the nondairy creamer for reconstitution shall impart a fresh, sweet, pleasing flavor, and shall be free from tallowy, stale, soapy, rancid, bitter, and scorched flavors.

When reconstituted and examined for performance, the fluid will be resistant to curdling or feathering in hot liquids and shall not settle out or oil off.

Age requirement: Unless otherwise specified in the solicitation, contract, or purchase order, the nondairy creamer for reconstitution shall not be over 90 days old at the time of delivery.

Analytical and microbiological requirements: The nondairy creamer for reconstitution shall meet the following analytical and microbiological requirements:

Fat	-	Not less than 38.0 percent
Protein	-	Not less than 2.0 percent
Moisture	-	Not to exceed 3.5 percent
Standard plate count	-	Not to exceed 20,000 per gram
Coliform count	-	Not to exceed 10 per gram
Salmonella	-	Negative

Contractor's certification.

By submitting an offer, the contractor certifies that the nondairy creamer for reconstitution offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The nondairy creamer for reconstitution shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, processing, packaging, labeling, storage, distribution, and sales of the product within the commercial marketplace. The nondairy creamer shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

Prior to award of contracts, the plant which manufactures the nondairy creamer for reconstitution shall be approved by the Dairy Grading Branch, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture. When required in the solicitation, contract, or purchase order, the Dairy Grading Branch will determine the quality of the nondairy creamer for reconstitution. The nondairy creamer for reconstitution shall be examined or analyzed in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers currently in effect on the date of the solicitation.

Preservation, packaging, packing, labeling, and marking.

The nondairy creamer for reconstitution shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.
