COMMERCIAL ITEM DESCRIPTION

PULMONARY EXERCISE UNIT, Plastic

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers a pulmonary exercise unit requiring an expiratory effort by the patient.

Salient characteristics:

The exercise unit shall consist of two (2) 700 to 1,000 milliliter bottles or containers with tubing attachments and a water coloring tablet. The bottles or containers may be either separate or integrally molded. If separate bottles are used they shall be secured together by a suitable means. The bottles, tubing, and attachments shall be fabricated of suitable plastic materials. The bottles shall be graduated from 100 ml to at least 700 ml in increments of 50 ml. The graduations shall be numbered at every 100 ml graduation. When a side by side bottle configuration is used means shall be incorporated to prevent the siphoning of water between the bottles. If a configuration is used where one bottle is mounted above the other bottle, the water shall automatically siphon back to the bottom bottle when the top bottle is full. The unit shall be suitable for encouraging deep breathing to improve respiratory functions of postoperative patients.

Workmanship. The pulmonary exercise unit shall be free defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). One package containing six (6) individually packaged sets, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices, and is the same as the product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U. S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Number is covered by this document:

6530-01-012-4955
