COMMERCIAL ITEM DESCRIPTION

MIXING PAD, PARCHMENT PAPER, DENTAL

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification GG-M-515.

This commercial item description covers a white parchment paper pad, suitable for use in mixing dental pulp protectors and zinc oxide-eugenol cements and paste.

Salient characteristics:

The mixing pad paper shall be white, pure vegetable fiber parchment, specially treated on both sides for high grease, oil, and water resistance. The paper shall prevent penetration when used with dental pulp protectors and zinc oxide-eugenol cements and pastes. The parchment paper shall be furnished in pads containing a minimum of 100 cleanly trimmed sheets, 7-3/4 to 8 inches by 6 + 1/8 inches in width. The sheets shall be glued on three sides. One short side shall be unglued to facilitate removal of sheets. Each pad shall be mounted on cardboard with a minimum thickness of .040 inch to serve as a base. The basis weight shall be 35.0 pounds + 5 percent (24 by 36 inches - 500 sheets). The bursting strength of the parchment paper shall be no less than 25 points. The tensile strength of the dry parchment paper shall be 24.0 pounds per inch, minimum, in the machine direction, and 15.0 pounds per inch, minimum, in the cross direction. The tearing resistance of the parchment paper shall be 26.0 grams, minimum, in the machine direction, and 26.0 grams, minimum, in the cross direction. When a mix of zinc oxide and eugenol dental impression paste is hand-spatulated on the top sheet, in accordance with normal dental procedures, the sheet of paper underneath shall show no evidence of stain. The vegetable parchment paper shall be treated with a water-soluble, Werner-type, chromium complex dissolved in isopropanol, and shall be water repellent. The mixing pads furnished shall contain no toxic or harmful ingredients and shall be furnished clean and ready for use.

Workmanship. The mixing pad shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Pad (PD). One pad of 100 sheets, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices, and is the same as the product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U. S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Number is covered by this document:
