COMMERCIAL ITEM DESCRIPTION

PAD, GROUNDING, ELECTROSURGICAL

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers an electrosurgical, adult, disposable, patient grounding pad.

Salient characteristics.

The pad shall be a disposable, adult size, pregelled electrosurgical patient dispersive pad suitable for use during electrosurgical procedures.

The pad shall have a conductive surface of approximately 4 by 6 inches.

The conductive surface shall consist of a sponge or other suitable material saturated with a low resistance hypo-allergenic conductive gel.

Beneath the sponge shall be a sheet of corrosion-resisting steel foil to which an individually insulated 2-wire cord shall be permanently connected. The cord shall be not less than 9 feet in length and permit connection to the electrosurgical apparatus. Aluminum foil or sheet shall not be acceptable beneath the saturated sponge. The entire perimeter of the pad shall contain adhesive to facilitate application to the skin and hold the pad in place on the patient. A protective peel-off cover to shield the conductive gel and minimize evaporation shall be provided.

Workmanship. The electrosurgical grounding pad shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). One package of 100 individually packaged electrosurgical grounding pads in airtight containers, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

FSC 6515

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

AMSC N/A

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

The following National Stock Number is covered by this document:

6515-01-092-7958

Ordering data. Intermediate/exterior quantities, labeling, and marking must be as specified in the contract and/or order.
