COMMERCIAL ITEM DESCRIPTION

DESTRUCTION UNIT, SYRINGE-HYPODERMIC NEEDLE

The General Services Administration has authorized the use of this commercial item description in preference to MIL-D-37528.

This commercial item description covers a small, portable, self-contained device suitable for safe destruction of hypodermic syringes and hypodermic needles.

Salient characteristics:

The destruction unit shall be a small, portable, self-contained device suitable for safe destruction of hypodermic syringes and hypodermic needles by use of shearing action. The unit shall consist of at least the following components:

1. A plastic receptacle.

2. A shearing device fabricated of corrosion-resisting steel, except for one movable and one fixed handle which may be plastic. The shearing device shall have two labeled apertures, one which will accept needles up to 18 gage and one approximately 3/8 inch diameter for the insertion of Luer-lock syringe tips. The movable shearing blade shall be attached to the stationary plate by means of a rivet. As an alternate, the shearing blade shall be readily detachable for sharpening or replacement.

3. A paperboard cup that fits inside of the plastic receptacle to collect and hold the needles and syringe tips.

The complete unit shall measure approximately 4 by 4 by 5 inches and shall weigh not more than one pound. The unit excluding the paper cup shall be readily cleanable and shall withstand repeated autoclaving at temperatures not exceeding 250 degrees Fahrenheit for 20 minutes.

Workmanship. The destruction unit shall be free from defects which detract from its appearance or impair its serviceability.

Unit. One each destruction unit, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices, and is the same as the product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U. S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

The following National Stock Number is covered by this document:
