MIL-C-60678B(AR)
AMENDMENT 1
20 May 1981

MILITARY SPECIFICATION

CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY TRACE-SELF DESTRUCT, M246

This amendment forms a part of Military Specification MIL-C-60678B(AR) dated 5 May 1970.

PAGE 9

Paragraph 4.3.4, Table I, 9/ Accuracy: Change "If the average mean radius of the sample cartridges exceeds the applicable requirement, a retest of 100 cartridges shall be tested" to "If the average mean radius of the sample cartridges exceeds the applicable requirement, a retest sample of 100 cartridges shall be tested for this accuracy parameter only."

PAGE 10

Paragraph 4.3.4, Table I, 11/ Impact function: Change "If more than two but less than five fail to comply, a second sample of 50 cartridges shall be tested" to "If more than two but less than five fail to comply, a second sample of 50 cartridges shall be tested for this impact function parameter only."

PAGE 13

Add to paragraph 4.4.6, "The 200 yard range may be reduced by 11.5 yards to accommodate combining test phases. Any variation from 200 yard range requires direct proportional adjustment of the average mean radius."
