Material. It is encouraged that recycled material be used when practical as long as it meets the requirements of this document. The basic material of the coverall shall be a cotton sateen, bleached white [illegible] meeting the following requirements:

Basic Material Component Testing

characteristic	Requirements	Test Method
Weight per sq.yd in ounces	9.0 (Max.)	ASTM D 3776,Option C
Yarns per inch		ASTM D 3775
Warp	85	
Filling	48	
Breaking strength in pounds (min)		ASTM D 5034
Warp	100	
Filling	90	
Dimensional stability	0.2 percent (Max.)	FED-STD 191- 5550 GSA
pH.	5.0 (Min) to 8.5 (Max)	ASTM D 2165

Cuffs, Wrist and ankle of the coverall. The cuffs shall be constructed seamless in one size on a circular knitting machine using a 1 x 1 rib stitch with one end of the elastic yarn laid in every sixth course in the rib knit area. The ends of the cuffs shall be tapered with a tuck or expanding stitch, with one end of the elastic yarn laid in every third course.

Cuff Material Component Testing

Characteristic	Min.	Test Method
Wales per inch	15	ASTM D 3887
Courses per inch	22	ASTM D 3887
Weight per doz. pairs, ounces	15.0	ASTM D 3887

Thread, polyester, cotton-covered. The thread for seaming and stiching shall be a polyester core, cotton-covered thread ticket

Check the source to verify that this is the current version before use.

number 30 or 50, 3 ply suitable for intended purposes. As an alternate, any bonded thread conforming to type 207, size number 30 or 50 3 ply may be used for stitching and seaming. The color of the thread shall be approximate the color of the basic material of the coverall

Fastener Tape. The Fastener Tape for the coverall shall have a 8.0 mil hook (330 denier). The hook and loop portions of the tape shall be 1 inch wide. The color shall approximate the shade shade of the basic material,white. The ground ends per tape (including selvages) shall be 174 (min., when tested. The tapes shall be constructed in accordance with the following:

Construction requirements for hook tapes (minimum)		Test Method
Hooks per liner inch of tape	- 191	Visual
Picks per liner inch of tape	- 51	Visual
Ground ends per tape (including selvages)	- 174	Visual
Hook ends per tape	- 30	Visual

Construction requirements for loop tapes (minimum)	
Picks per inch	- 51
Ground ends per tape (including selvages)	- 149
Loop pile ends per tape	- 28

Physical Requirements Of The Hook And Loop Tapes

	Hook	Loop	Test Methods FED-STD
Sheer Strength			5610 & 5100
Weight(Min) oz/sq	5.9	7.4	ASTM D 3776 Option C
Breaking Strength (Min.)	125	95	ASTM D 5034

In addition, the hook and loop tapes shall have a minimum shear strength of 15 0 lbs and the Non - Melting/ Aramid yarns shall have a carbonizing temperature of not less than 675 ^{O} F(357 ^{O} C).

Sizes. The coveralls shall be provided in the following sizes:

Sizes - XX-Small XX-Small X-Small, Small, Medium, Large, X-large XX-Large

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T09:44Z
Check the source to verify that this is the current version before use.

NOTE: XXX-Small, XX-Small, X-Small, Small, Medium, Large, X-Large, and XX-Large may be abbreviated as XXXS, XXS, XS, S, MED, LG, XLG, and XXLG.

Label/marking.

A commercial type label is acceptable, provided that an information label containing the contractor's name, contact number, size and National Stock Number (NSN) is included on the commercial label. The commercial label shall include fiber and laundering information.

To attach the label. Center combination identification/size/instruction label on the inside of the back with the top of the label parallel to and 1/4 to 1/2 inch below top raw edge of back. Stitch all four sides of label, 1/8 inch from the edge.

Sizes and measurements (inches)

size	Chest 1/	Sleeve length 2/	Leg inseam 3/
XXX-Small	16	18 1/4	24 1/4
XX- Small	18	18 3/4	25
X Small	20	19 1/4	25 3/4
Small	22	19 3/4	26 1/2
Medium	24	20 1/4	27 1/4
Large	26	20 3/4	28 1/2
X-Large	28	21 1/2	30
XX -Large	30	22	30
Tolerance:	+ 1 -	+ 1/2 -	+ 1/2 -

NOTE: The above measurements shall be taken with coveralls fastened and laid out smooth and flat.

1/ Chest - Measurements taken across front at base of arm holes from folded edge to folded edge.

2/ Sleeve Length- Measurement taken from base of armholes along inseam to seamline at top of knitted cuff.

3/ Leg inseam Measurement taken from crotch seam along inseam to seamline at top of knitted cuff

Workmanship. After completion, the finished, coveralls shall be thoroughly cleaned, and all loose thread, lint, and foreign matter removed

Product Demonstration Model When required, offerors shall submit samples of their intended product on The Product

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T09:44Z
Check the source to verify that this is the current version before use.

Demonstration Model will consist of units independently developed. Product Demonstration Models will be analyzed and evaluated by the government. Evaluation criteria and basis for award are contained in the solicitation. Product Demonstration Models will be retained by the government. One (1) Product Demonstration Model approved by DPSC under the resultant contract will serve as a manufacturing standard for the corresponding production items delivered under this contract. Offerers are advised that the Product Demonstration Model does not relieve the successful offerer of his responsibility to perform in accordance with the Commercial Item Description specified above.

Quality Assurance

Certification. The contractor shall certify that the product offered meets the salient characteristics and all other requirements of this description and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices The government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for, under the provisions of the contract. Reliance on contractor QA systems shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the government for acceptance comply with all requirements of the contract.

Examination. Lots of Coveralls shall be inspected in accordance with "Sampling Procedures and Tables for Inspection by Attributes", ANSI/ASQC Z1.4, published by the American Society for Quality Control.

Visual Examination. The inspection level for visual examination shall be level II and the AQL shall be 4.3. The sample unit is one coverall

Dimensional Examination. The finished Coverall shall conform to the dimensions specified. Any dimension that is not within the established tolerance shall be classified as a defect. The sample unit shall be one coverall; the inspection level shall be S-2 and the AQL shall be 4.3.

Packaging Examination. The fully packaged shipping containers shall be examined in accordance with defects listed below. The lot size shall be expressed in units of shipping containers. The sample unit shall be one shippping container fully packaged The inspection level shall be S-2 and the acceptable quality level (AQL), expressed in terms of defects per hundred units, shall be 2.5

EXAMINE	DEFECT
Marking (exterior and interior)	Omitted: incorrect; illegible; of improper size, location,or method of application
Materials	Any component missing, damaged, or not as specified
Workmanship	Inadequate application of components, such as: incomplete closure of container flaps, loose strapping, improper taping, or inadequate stapling
Content	Number of items per container is more or less than required
	NSN shown on one or more items not as specified on shipping container
Palletization	length, width, or height exceeds specified maximum requirements
	pallet type not as specified
	load not bonded as specified

Defects. The coveralls shall be examined for the following defects: any hole,cut, tear, color not as specified; any spot or stain or woven in waste (outside); thread ends not removed; label missing, incorrect, or illegible; measurement of item not as specified; open seam

Packaging, Packing, Marking, and Palletization
Packaging, packing, marking and palletization shall be in accordance with ASTM-D 3951, Standard Practice for Commercial Packaging, as specified for shipments to the Department of Defense, including Section 7. Shipping cartons shall be style RSC-L, variety SW, with DW liners, class domestic, grade 275.

Note: Each shipping container shall contain only one National Stock Number (NSN) and a total quanity of Eighteen (18) coveralls packaged as specified as above.

Unitized loads, placing boxes on pallets, shall be used whenever total quantity for shipment to one destination exceeds 250 pounds (excluding the pallet) or 20 cubic feet. Pallets shall have a length of 40 inches and a width of 48 inches. Pallet loads, including the pallet, shall not exceed 54 inches in height, 48 inches in length and 52 inches in width.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T09:44Z
Check the source to verify that this is the current version before use.

The containers shall be bonded onto wing type commercial 4-way entry pallets.

Note: All palletized loads shall contain only one NSN, to the maximum extent possible. When there is less than a pallet load per NSN, pallets shall be marked "mixed" and each applicable NSN shall be listed together with its total quantity.
