Workmanship. The holder shall be clean and free from dirt, oil, or any other foreign matter; rough or sharp edges; scratches; scuffs; cracks; creases; blisters; bubbles; pimples; undispersed resin; pits; tears; cuts; or holes.

Product Demonstration Model. When required, offerers shall submit samples of their intended production. The Product Demonstration Model consist of units independently developed. Product Demonstration Models will be analyzed and evaluated by the government. Evaluation criteria and basis for award are contained in the solicitation. Product Demonstration Models will be retained by the government. One (1) Product Demonstration Model approved by DPSC under the resultant contract will serve as a manufacturing standard for the corresponding production items delivered under this contract. Offerers are advised that the Product Demonstration Model does not relieve the successful offerer of his responsibility to perform in accordance with the Commercial Item Description specified above.

Quality Assurance

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices. The government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for, under the provisions of the contract.

Examination. The Holders shall be inspected in accordance with "Sampling Procedures and Tables for Inspection by Attributes", ANSI/ASQC Z1.4, published by the American Society for Quality Control.

Visual Examination. The inspection level for visual examination shall be I and the "Acceptable Quality Level (AQL)" shall be 1.0. The sample unit is one holder.

Dimensional Examination. The finished holder shall conform to the dimensions specified. Any dimension that is not within the established tolerance shall be classified as a defect. The sample unit shall be one holder; the inspection level shall be S-3 and the AQL shall be 2.5

Defects. The holder shall be examined for the following defects: not made of the specified material; color not transparent; any cracks; blisters. Scratches, cuts, tear, cuts, tears cracks, wrinkles or scuffs; rough edges; surfaces containing voids, pockets or any noticeable defects; holder not clean; measurement of item not as specified.
