# COMMERCIAL ITEM DESCRIPTION

# TROUSERS, DISPOSABLE

The General Services Administration has authorized the use of this commercial item description.

1. **SCOPE.** This Commercial Item Description covers the requirements for a disposable trouser of nonwoven, coated, spunbonded olefin fabric, intended primarily for use as part of a protective ensemble used to protect torpedo handlers from exposure to Otto fuels.

2. **SALIENT CHARACTERISTICS**

2.1 Description. The disposable trousers shall be made of a nonwoven coated, spunbonded olefin fabric and shall be straight leg with an elasticized rubber tape waistband and with no fly opening. The color shall be white. The seams shall be formed by super-imposing two plies of material, folding both the edges back over the body of material and overedging. The minimum and maximum number of stitches per inch shall be 6 and 8 respectively, including the elastic tape waistband fully extended. The stitch gauge and stitch length shall produce adequately durable seams throughout the garment.

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Defense Personnel Support Center, Clothing and Textiles Directorate, Attn: DPSC-FNSE, 2800 South 20th Street, Philadelphia, PA 19145-5099.

Check the source to verify that this is the current version before use.

2.2 Material. The basic material shall be white polyethylene coated spunbonded (nonwoven), nonperforated olefin fabric conforming to the requirements in Table I. The coated side of the fabric shall be the face side.

TABLE I. - Material requirements

| Characteristic | Requirements | Test method |
|---|---|---|
| Weight: (min.) oz./sq. yd. | 2.0 | ASTM-D3776, OPT. C |
| Breaking strength: (min.) pounds | | ASTM-D5034 |
| Machine direction | 9.0 | |
| Cross direction | 10.0 | |
| Tearing strength: (min.) | | ASTM-D1424 |
| Machine direction | 2.0 | |
| Cross direction | 3.0 | |
| Hydrostatic resistance: p.s.i. (min.) | 30 | ASTM-D751 1/ 2/ |

1/ The coated side shall be exposed to the water.

2/ Procedure A - Pressure application by Mullen type Hydrostatic Tester, sections 34-37, Procedure 1 (except that the rate of displacement shall be as specified in section 34.2) shall be used.

2.3 Thread. The sewing thread shall be commercial type, suitable for the purpose intended. The color of the thread shall be white. Skipped stitches and thread breaks shall be repaired by stitching not less than 1/2 inch beyond each end of the defect.

2.4 Waistband, elastic. The elastic waistband shall be a minimum of 3/8 inch wide and shall be either a cut rubber tape, or a woven, braided, or knitted elastic webbing. The color shall be white.

Check the source to verify that this is the current version before use.

2.5 Sizes and Measurements. The finished trousers shall conform to the measurements in Table II.

TABLE II. Finished measurements (in Inches)

| Sizes | A Waist | B Inseam |
|---|---|---|
| X-Small | 21 | 32 |
| Small | 22 | 32 |
| Medium | 24 | 33 1/2 |
| Large | 26 | 33 1/2 |
| X-Large | 28 | 35 |
| XX-Large | 29 | 35 |
| Tolerance: | ± 1 | ± 1/2 |

Measurement (A) shall be taken from side seam to side seam at waist, with the elastic tape waistband fully extended.

Measurement (B) shall be taken from crotch to bottom open edge of leg.

2.6 Labels. A commercial-type label is acceptable, provided that an additional cloth label containing the contractor's name, contract number, size and National Stock Number (NSN), and cautionary statement is placed directly on the trouser by printing, stamping, stenciling or printed on a pressure sensitive label that adhere to the inside of the garment. The cautionary statement shall be printed in larger letters than all other lettering on the label and shall read:

**CAUTION: THIS GARMENT SHALL NOT BE REUSED AND MUST BE DISCARDED WHEN OTTO FUEL STAINS ARE OBSERVED**

2.7 Label/tag. Each item shall be individually bar-coded with a paper tag for personal clothing items. The paper tag shall be standard bleached sulfate having a basis weight of 100 pounds. The paper used for the tags shall have a smooth finish to accept thermal transfer and direct printing. The tags shall have a hole and shall be attached to each item by a fastener, clearly legible and readable by a scanner. The bar coding element shall be a 13 digit national stock number (NSN). The bar code type shall be a medium to high code density and shall be located so that it is completely visible on the item when it is folded and/or packaged as specified and so that it causes no damage to the item.

Check the source to verify that this is the current version before use.

2.8 Patterns. The government shall furnish a single size pattern. The contractor is responsible for grading patterns for additional sizes. The pattern generally provides for a seam allowance of 3/8 to 1/2 inch for joining seams. The government patterns shall be used to make the contractor's working patterns. Commercial patterns may be used in lieu of the government furnished pattern provided they conform to the cited design and finished measurements.

3. **REGULATORY REQUIREMENTS.** The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. **QUALITY ASSURANCE PROVISIONS**

4.1 Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this commercial item description and conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4.2 Market acceptance criteria. The item offered, or a generic equivalent, must have been sold to the commercial market or to the Government for at least two years.

4.3 Warranty. The item offered shall include the standard warranty given to the commercial market beginning with the date of delivery of the individual items.

4.4 Visual examination. Each trouser shall be examined for the defects listed below:

Defects. Any hole, cut, or tear; color not as specified; any part shaded; any spot or stain (outside); raw edges, open seams, thread ends not removed, or loose tension resulting in loose seams; any material defects, distorted parts or poor workmanship; any component part omitted; label missing, incorrect, or illegible; cautionary statement lettering not larger than all other lettering; measurement of item not as specified; bar code omitted or not readable by scanner; human-readable interpretation (HRI) omitted or illegible; bar code not visible on folded, packaged item; bar code causes damage to the item; any items not packaged in accordance with the contract or purchase order.

5. Preservation, Packing, and Marking. The preservation, packing, and marking shall be as specified in the contract or order.
