FEDERAL SPECIFICATION SHEET

TRIANGLES, LINE GUIDE, LETTERING, NONADJUSTABLE, PLASTIC

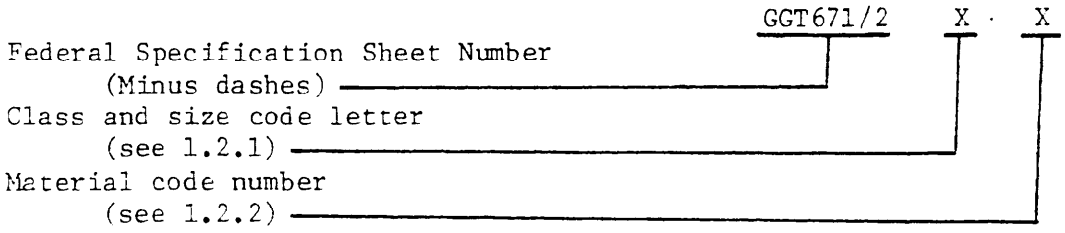

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

The complete requirements for procuring triangles described herein shall consist of this document and the latest issue in effect of Federal Specification GG-T-671.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This specification sheet covers the specific requirements for Type II transparent plastic lettering triangles.

1.2 Classification. Line guide lettering triangles covered by this specification shall have a definitive Federal specification part number and shall be designated in the following form (see 6.2 and 6.3).

FSC 6675

1.2.1 Class and size of line guide lettering triangles. The class and size of line guide lettering triangles are identified by a single letter (see Table I).

Table I. Class and size code letter

Size 1/ (Inches)	Class	
	A	B
4	-	E
6	C	F
8	D	G

Class A - 30 degree - 60 degree angle.
Class B - 45 degree angle.

Note:
1/ The size of the triangle is the length of the longest side other than the hypotenuse.

1.2.2 Material. The material from which the line guide lettering triangle is made is identified by a one digit (see Table II).

Table II. Material code number

Code number	Material
1	Acrylic
2	Methacrylate
3	Polystyrene
4	Vinyl plastic

3. REQUIREMENTS

3.1 Description. The line guide lettering triangle shall be in accordance with GG-T-671 and as specified herein.

3.2 Fabrication. The line guide lettering triangle shall be plastic with a thickness from 0.05 to 0.09 inch. The angles shall be within plus or minus 2 minutes of the angle specified. The outside or ruling edges shall be straight and true within plus 0.003 inch. The surfaces of the triangles shall be flat and true within 0.010 inch.

Check the source to verify that this is the current version before use.

3.2.1 Guideline holes and center cutout. Lettering triangles shall be provided with guideline holes, a cutout guide to provide an angle of 67-1/2 degrees from the horizontal, and center cutout. All guideline holes shall be tapered. Spacing of guideline holes shall be such that guidelines for uppercase letters vary in height from 3/32 to 1/4 inch, in increments of 1/32 inch. The inner edges shall be beveled for fingernail grips or shall be otherwise designed so that the triangle can be easily lifted from a flat surface.

6. NOTES

6.1 Intended use. The line guide lettering triangles are used to draw guidelines for freehand lettering and in drafting and preparing drawings.

6.2 Ordering data. Procurement documents should specify those desired options offered in GG-T-671 and should also specify the following:

(a) Federal specification sheet part number required (see 1.2).

6.3 Federal specification part number definition. The Federal specification part number is a definitive part number which corresponds to the class and size of line guide lettering triangles covered by this specification sheet and defines the requirements of the options presented under this specification. The Federal specification part number is formed by combining the Federal specification number (without the dashes) with a dash after it, the class and size of line guide lettering triangle code letter, and the material code number as shown in 1.2.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS: This form is provided to solicit beneficial comments which may improve this document and enhance its use. DoD contractors, government activities, manufacturers, vendors, or other prospective users of the document are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity. A response will be provided to the submitter, when name and address is provided, within 30 days indicating that the 1426 was received and when any appropriate action on it will be completed.

NOTE: This form shall not be used to submit requests for waivers, deviations or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.

DOCUMENT IDENTIFIER *(Number)* AND TITLE

GG-T-671/2B Triangles, Line Guide, Lettering, Nonadjustable, Plastic

NAME OF ORGANIZATION AND ADDRESS OF SUBMITTER

☐ VENDOR ☐ USER ☐ MANUFACTURER

1. ☐ HAS ANY PART OF THE DOCUMENT CREATED PROBLEMS OR REQUIRED INTERPRETATION IN PROCUREMENT USE? ☐ IS ANY PART OF IT TOO RIGID, RESTRICTIVE, LOOSE OR AMBIGUOUS? PLEASE EXPLAIN BELOW.

A. GIVE PARAGRAPH NUMBER AND WORDING

B. RECOMMENDED WORDING CHANGE

C. REASON FOR RECOMMENDED CHANGE(S)
