COMMERCIAL ITEM DESCRIPTION

PANS; CAKE, MUFFIN, AND PUDDING

The General Services Administration has authorized the use this commercial item description as a replacement for RR-P-54 and RR-P-62 which have been cancelled.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This commercial item description covers pans used for cakes, muffins, and pudding.

1.2 Classification. The pans shall be of the following types and styles.

Type I - Round cake pan

Type II - Muffin pan
Style A - Lock seamed, heavy duty
Style B - One-piece

Type III - Pudding pan, 3 quart

2. APPLICABLE DOCUMENTS

2.1 The documents referenced in this commercial item description shall be the issues in effect on the date of issuance of the invitation for bids or request for proposal unless otherwise specified. These documents form a part of this commercial item description to the extent specified. In the event of a conflict between this commercial item description and a document referenced herein, this commercial item description shall take precedence.

Federal Standard:

FED-STD-376 - Preferred Metric Units For General Use By The Federal Government.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor St., Fort Worth, TX 76102

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited

Copies of Federal standards are available from the General Services Administration Business Service Centers in Boston, MA; New York, NY; Philadelphia, PA; Washington, DC; Atlanta, GA; Chicago, IL; Kansas City, MO; Fort Worth, TX; Denver, CO; San Francisco, CA; Los Angeles, CA; and Seattle, WA.

Military Standard:

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.

Copies of military standards may be obtained from Standardization Documents Order Desk, Bldg. 4D, 700 Robbins Avenue, Philadelphia, PA 19111-5094.

ASTM Standard:

E 29 - Standard Practice For Using Digits In Test Data To Determine Conformance With Specifications.

Application for copies of ASTM standards should be addressed to ASTM, 1916 Race Street, Philadelphia, PA 19103.

Baking Industry Sanitation Standards Committee (BISSC) Standard:

35 - Baking Pans

Application for copies of BISSC standards should be addressed to BISSC, 111 E. Wacker Drive, Suite 600, Chicago, IL 60601.

3. SALIENT CHARACTERISTICS

3.1 Design and construction.

3.1.1 Type I, Round cake pan. The cake pan shall be formed seamless from a single piece of 3000 series aluminum with a minimum thickness of 0.030 inch. The round pan shall have a top outside diameter of 9 inches, plus 5/8 inch, minus 1/8 inch. The pan shall have a top inside diameter of 8-1/2 inches, plus 5/8 inch, minus 1/8 inch. The bottom outside diameter shall be 8 inches minimum. The outside vertical depth of the pan shall be 1-1/2 inches minimum. The top edge of the pan shall have a rolled bead.

3.1.2 Type II, Muffin pan. The muffin pans shall be formed from 3000 series aluminum or aluminized steel with a minimum thickness of 0.030 inch. Both style pans shall have 12 muffin cups. The overall dimensions of the pans shall be 10-5/8 inches by 13-7/8 inches with tolerances of plus or minus 3/4 inch.

Check the source to verify that this is the current version before use.

The muffin cups shall have a top inside diameter of 2-3/4 inches, bottom inside diameter of 2 inches, and inside depth on the slant of 1-3/8 inches (tolerances of plus or minus 1/4 inch for each). The edges of the pans shall have a rolled bead.

3.1.2.1 Style A, Lock seamed, heavy duty. The style A pan shall consist of a rack in which 12 cups are individually secured.

3.1.2.2 Style B, One-piece. The style B pan shall be constructed with 12 cups and shall be formed seamless from a single piece of material. The minimum sidewall thickness for the cups shall be 0.020 inch.

3.1.3 Type III, Pudding pan. The pudding pan shall be formed seamless from a single piece of 3000 series aluminum with a minimum thickness of 0.020 inch. The pan shall have a maximum top outside diameter of 10-5/8 inches and a top inside diameter of 9-7/8 inches, plus or minus 1/4 inch. The inside depth shall be 3-1/4 inches, plus or minus 1/4 inch. The pan shall have a capacity of 3 quarts, plus or minus 10 percent.

3.2 Marking. The pans shall be permanently marked with the manufacturer's name, trade name, or trademark of such known character that the source of the pan may be readily determined.

3.3 BISSC Standard compliance. The pans shall comply with all provisions of BISSC Standard No. 35, Baking Pans.

3.4 Workmanship. Pans shall have no sharp edges, slivers, burrs, deep scratches, tool marks, or other defects which might affect serviceability, durability, or appearance.

3.5 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

3.6 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch/pound units, provided they fall within the tolerances specified using conversion tables contained in the latest revision of FED-STD-376, and all other requirements of this commercial item description are met.

3.7 Commercial item. The use of the term "commercial item description" in this document does not imply that any item or items offered are not required to conform with all requirements specified herein.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

4.2 Sampling. The levels of inspection and acceptable quality levels (AQL's) shall be in accordance with MIL-STD-105.

4.3 Lot formation. All pans of the same type and style, if applicable, from the same manufacturer offered for delivery at one time shall be considered a lot for purposes of inspection.

4.4 Sampling for visual and dimensional examination. A random sample of pans shall be selected from each lot in accordance with inspection level S-4, AQL 4.0 expressed in terms of defects per hundred units. The sample unit shall be one pan. The sample pans shall be visually and dimensionally examined to verify compliance with table I and the remainder of this commercial item description. Tolerance limits specified are absolute as defined in ASTM E 29.

TABLE I. Classification of defects

Examine	Defect
Finish	Area of corrosion
	Stained or discolored
Construction and Workmanship	Scratch or tool mark on interior surface, clearly noticeable 1/
	Scratched, pitted, or tool mark on exterior surfaces 1/
	Any sharp edge, sliver or burr
	Any part missing, or not specified size
	Any component fractured, split, bent, buckled, punctured or otherwise impaired
	Capacity not as specified, if applicable
	Dimensions not as specified

1/ - An unacceptable scratch is one that will catch a fingernail when run across it.

Check the source to verify that this is the current version before use.

4.5 Examination for preparation for delivery. A random sample of shipping containers shall be selected from each lot for examination of unit, intermediate and shipping containers (as applicable) for conformance with the preservation, packaging, packing, labeling, and marking required in the contract or order. Samples shall be selected in accordance with inspection level S-2, AQL 6.5, expressed in terms of defects per hundred units. The sample unit shall be one shipping container.

5. PREPARATION FOR DELIVERY

5.1 Packaging, packing, and marking. The packaging, packing, and marking shall be as specified in the contract or order.

6. NOTES

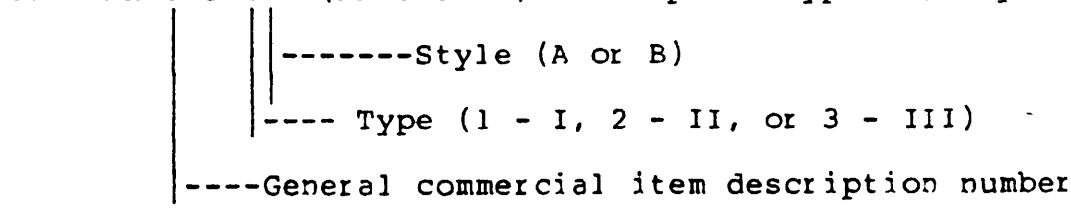

6.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents (if applicable).

a. Title, number and date of this commercial item description.
b. Type and style, if applicable, pan required (see 1.2)
c. The packaging, packing, and marking desired.

6.2 CID based part identification numbering. Pans conforming with this commercial item description shall be identified by a part identification number configuration consisting of identification of a portion of the CID number, type, and style. An example of the part identification number configuration is shown below. This part identification numbering system is intended for identification and cross-indexing of the item within the Federal cataloging system. Part identification numbers are not required to be placed on the product or container.

Part Identification Numbering System for Commercial Item Description A-A-1073

Example: AA1073-2A (AA1073-2A) Example - Type II, Style A pan

Check the source to verify that this is the current version before use.

6.3 National Stock Numbers (NSNs): The following is a list of NSNs assigned which correspond to this CID. The list may not be indicative of all possible NSNs associated with this CID.

NSN	Nomenclature	P/N
7330-00-205-3150	Pan, Cake, Round	AA1073-1
7330-00-244-4549	Pan, Muffin	AA1073-2A
7330-00-143-0965	Pan, Muffin	AA1073-2B
7330-00-655-5257	Pan, Pudding	AA1073-3
