COMMERCIAL ITEM DESCRIPTION

CASE, MAINTENANCE AND OPERATIONAL MANUALS

The General Services Administration has authorized the use of this commercial item description as a replacement for Military Specification MIL-C-11743 for all federal agencies.

1. SCOPE. This specification covers cases for equipment documentation.

2. SALIENT CHARACTERISTICS.

2.1. Description. This is a pliable case used to store equipment documentation in a readily available location while protecting that documentation from moisture.

2.2. Materials. The contractor shall select the materials, but the materials shall be capable of meeting all of the operational and environmental requirements specified herein. Recovered materials shall be used to the maximum extent possible.

2.2.1. Deterioration prevention and control. The case shall be fabricated from compatible materials, inherently decay and tear resistant or treated to provide protection against the various forms of deterioration and wear to which the material is susceptible.

2.2.1.1. Dissimilar metals. Dissimilar metals shall not be used in intimate contact with each other unless protected against galvanic corrosion.

2.2.2. Recycled, recovered, or environmentally preferable materials. Recycled, recovered, or environmentally preferable materials should be used to the maximum extent possible provided that the material meets or exceeds the operational and maintenance requirements, and promotes economically advantageous life cycle costs.

Beneficial comments recommendations, additions, deletions, clarification, etc., and any other data which may improve this document should be sent to: U.S. ARMY TOPOGRAPHIC ENGINEERING CENTER, ATTN CETEC-PD-TE, 7701 TELEGRAPH ROAD, ALEXANDRIA, VA 22315-3864.

AMSC N/A FSC 7520

Distribution Statement A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

2.2.3. Watertightness. The case shall be fabricated from water-repellent material.

2.2.4. Color. Materials used in the construction of the case shall be army green in color.

2.2.5. Grommets. The case shall contain six grommets, or similar fixtures, for mounting. The grommets or fixtures shall have an opening of .240 ± .005 inside diameter. To ensure proper interface with existing equipment, placement of the grommets shall be as shown on Figure 1.

2.3. Dimensions. The case shall be of a size and shape to accommodate the storage of a technical manual (9 x 11 x 2 inches) and a check card (11 x 17 x 1 inches) or as otherwise required in the contract.

2.4. Environmental requirements. The case shall be constructed in such a way as to be unaffected by extremes in temperature.

2.5. Use. The case shall permit ease of use by personnnel wearing heavy gloves or mittens.

3. QUALITY ASSURANCE PROVISIONS. The supplier shall comply with the following for certification and acceptability.

3.1. Product conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards, and quality assurance practices, and be the same product offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

3.2. Market acceptability. The case offered shall be of the latest model of the standard product of the supplier and shall have been used in the field for at least one year by commercial organizations.

3.3. Examination. Each case shall be examined for compliance with the requirements specified in 2.2 through 2.5. No seam shall lessen the strength, durability or watertightness of the case. Any modification necessary following failure to meet the specified requirements shall receive particular attention for adequacy and suitability. This element of inspection shall encompass all examinations of performance and dimensional requirements. Non-compliance with any specified requirement, or the presence of one or more defects lessening maximum efficiency shall constitute cause for rejection.

4. PACKAGING. Preservation, packing, and marking shall be as specified in the contract or order.

5. NOTES.

5.1 Ordering data. Procurement documents should specify the following:

(1) Title, number, and date of this specification.
(2) Preservation, packing, and marking required.

Check the source to verify that this is the current version before use.

5.2. The procuring agency should specify the level of preservation, packing, and marking required.

5.3. When this Commercial Item Description is used for procurement the contractor certification clause should appear in the solicitation.

5.4. Recovered materials. For the purpose of this requirement, recovered materials are those which have been collected from solid waste and reprocessed to become a source of raw materials, as distinguished from virgin raw materials. Used, rebuilt, or remanufactured component, pieces and parts shall not be incorporated in the case.

5.5. Subject term (key word) listing.

Bag, manuals and cards
Pocket, manuals and cards
Pouch, manuals and cards
