COMMERCIAL ITEM DESCRIPTION

# NAVIGATOR'S PLOTTING INSTRUMENT SET AND CASE

The General Services Administration has authorized the use of this commercial item description as a replacement for MIL-N-634C for all federal agencies.

1. SCOPE. This commercial item description (CID) covers one type of plotting instrument set consisting of a storage case, a compass, a divider, a screwdriver, two additional leads, a complete additional set of needle points, one of each type and size of fastener used to secure the leads and needle points, and a vial for containing the additional leads, needles and fasteners.

2. SALIENT CHARACTERISTICS

2.1 Components. The set shall contain a case, compass, a divider, a screwdriver, two additional leads, a complete additional set of needle points, one of each type and size of fastener used to secure the leads and needle points, and a vial for containing the additional leads, needles and fasteners.

2.1.1 Compass. The compass shall be corrosion-resistant. The compass length shall be a minimum of 5-1/2 inches and a maximum of 6-1/2 inches, measured from center of pivot end of legs, exclusive of lead or needle point. The needle point shall be held by a corrosion-resistant device that allows the point to pivot on the leg. The needle shall be reversible and replaceable in its carrier. Points shall have an ordinary needle point on one end and a short point with a shoulder on the opposite end to limit the entering depth of the point. The pencil lead shall be held in place by a corrosion-resistant device affixed to the leg. With lead and needle points extended one-quarter inch from the ends of their legs, the compass will close the points to within one-thirty-second of an inch of each other. A corrosion-resistant, straightening device shall be fitted to keep the head centered and up with reference to the legs (bisecting the angle of the legs) of the instrument and provide equal and simultaneous movement of each lead during adjustment. The

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any other data which may improve this document should be sent to: Defense Supply Center Richmond (DSCR), ATTN: DSCR-VBD, 8000 Jefferson Davis Highway, Richmond, VA 23297-5610.

legs shall be attached at the pivot point by a friction joint that shall permit opening and closing with a smooth, uniform, and continuous movement. Head construction shall be such that a locking device is not required.

2.1.2 Divider. The divider shall be identical to the compass (see 2.2.1), except that both legs shall be fitted to take reversible and replaceable steel needle points which shall be firmly held in place by fasteners.

2.1.3 Needle points, screw studs, and insert lugs. Needle points and holding device shall be made of corrosion-resistant steel.

2.1.4 Lead and needle point holder. The extra lead, needle points and fasteners shall be stored in a corrosion-resistant holder with a removable top.

2.2 Instrument and case markings.

2.2.1 Instruments. Each compass and divider shall be marked in a plain and permanent manner with manufacturer's name or identifying trademark.

2.2.2 Case. The case shall not exceed 8 inches long, 3 inches wide, and 1 inch high. The case shall have a permanently attached cover to protect the instruments and accessories and shall provide a means of securing them inside the case. The case shall be lined with a non-abrasive cushioning material and the case fasteners shall be corrosion-resistant. The top flap or lid of the case shall have the following notation embossed in a contrasting color in the center on the outside surface:

a. Navigator's Plotting Instrument Set
b. National Stock Number
c. Manufacturer's Name
d. Specification or Contract Number and Year
e. U.S.

## 3. REGULATORY REQUIREMENTS

3.1 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

## 4. QUALITY ASSURANCE PROVISIONS

4.1 Product conformance. The product provided shall meet the salient characteristics of this commercial item description; conform to the producer's own drawings, specifications, standards, and quality assurance practices; and be the same product as that which the supplier offers for sale on the commercial market. The government reserves the right to require proof of such conformance.

Check the source to verify that this is the current version before use.

4.2 Market acceptability. The product offered shall be of the latest model of the standard product of the supplier and have been used in the field for at least one year by commercial organizations.

5. PACKAGING

5.1 Preservation, packing, and marking. For acquisition purposes, the products shall be preserved, packed, and marked as specified in the acquisition order (see 6.4(c)).

6. NOTES

6.1 Sources of documents.

6.1.1 FAR. The FAR may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-0001.

6.2 National stock number (NSN). The following NSNs correspond to this CID. These may not be indicative of all possible NSNs associated with this document.

6675-00-240-1876
6675-00-243-5015
6675-00-285-6161
6675-00-286-0602

6.3 Sources of supply. The manufacturers and/or suppliers listed below are known to supply products which meet the salient characteristics requirements of this document. Competition is not limited to the listed firms.

Vane Brothers Company
4209 Newgate Avenue
Baltimore, MD 21224-6416
1-888-441-5167

Weems and Plath Incorporated
222 Severn Avenue
Annapolis, MD 21403-2531
1-410-263-6700

Dresser Argus Incorporated
36 Bridge Street
Brooklyn, NY 11201-1115
1-718-643-1540

6.4 Ordering data. Acquisition documents must specify the following information:

a. Title, number, and date of this document
b. Unit and quantity required
c. Packaging requirements (see 5.1)
