FEDERAL SPECIFICATION

APPLE JUICE, SINGLE STRENGTH, CANNED

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. CLASSIFICATION

1.1 **Style.**—Canned single-strength apple juice shall be unsweetened and shall be of the following styles, as specified (see 6.2):

Style I. —Clear
Style II.—Cloudy

1.2 **Grades.**—Canned single-strength apple juice shall be of the following grades, as specified (see 6.2):

Fancy (Grade A)
Standard (Grade C)

2. APPLICABLE SPECIFICATIONS AND OTHER PUBLICATIONS

2.1 **Specifications.** — There are no other specifications applicable to this specification except those referenced in section 7 by individual departments.

2.2 **Other publications.** — The following publications, of the issues in effect on date of invitation for bids, form a part of this specification.

Governmental:

Federal Food, Drug, and Cosmetic Act and General Regulations for its Enforcement.

Nongovernmental:

Official Methods of Analysis of the Association of Official Agricultural Chemists.

(Copies of Federal specifications, the Federal Specifications Index, and the Federal Food, Drug, and Cosmetic Act and General Regulations for its Enforcement may be obtained upon application, accompanied by money order, coupon, or cash to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

(Copies of Federal specifications and the Federal Specifications Index may also be obtained from the GSA Regional Offices in Boston, New York, Atlanta, Chicago, Kansas City, Mo., Dallas, Denver, San Francisco, and Seattle. Prices may be obtained from the Superintendent of Documents.

(Official Methods of Analysis of the Association of Official Agricultural Chemists is published by the Association of Official Agricultural Chemists, P. O. Box 540, Benjamin Franklin Station, Washington 4, D. C.)

3. REQUIREMENTS

3.1 **Material.** — Canned single-strength apple juice shall be prepared from the undiluted, unconcentrated, unfermented liquid obtained from the first pressing juice of properly prepared, sound, fresh apples, excluding the liquid obtained from any additional residual apple material. Canned single-strength apple juice shall be of the latest pack, unless otherwise specified.

3.2 **Federal Food, Drug, and Cosmetic Act.**—All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act, and regulations promulgated thereunder.

3.3 **Fill of container.**—The single-strength apple juice shall occupy not less than 90 percent of the volume of the container.

Check the source to verify that this is the current version before use.

3.4 **Description of grades.**—Unless otherwise specified, the interpretation of requirements (descriptive terms) contained in 1.1, 1.2, 3.5, and 3.6 shall be in accordance with the United States Standards for Grades of Canned Apple Juice in effect on the date of invitation for bids.

(Copies of these standards may be obtained, without charge, from the U. S. Department of Agriculture, Washington 25, D. C.)

3.5 **Fancy (Grade A).** — Canned single-strength apple juice of this grade shall possess a very good color, shall be practically free from defects, and shall possess a very good flavor.

3.6 **Standard (Grade C).**—Canned single-strength apple juice of this grade shall possess a good color, shall be fairly free from defects, and shall possess a good flavor.

3.7 **Workmanship.** — Canned single-strength apple juice shall be processed under sanitary conditions and in accordance with good commercial practice. The product shall be sufficiently processed by heat to assure preservation in hermetically sealed containers, either tin or glass, as specified. Containers shall be sound and clean. Cans shall be free from rust and serious dents, and the ends shall be flat or concave.

4. SAMPLING, INSPECTION, AND TEST PROCEDURES

4.1 **Sampling.**—Samples of finished products covered by this specification and samples of any materials, components, or constituents entering into the preparation of the finished products may be taken at any time by the Government inspector to determine compliance with the requirements.

4.2 **Inspection.**

4.2.1 *General.*—Inspection shall be made by the procuring agency or a duly authorized representative at the time and place designated by the procuring agency. It may be made at the site of manufacture, both during and after processing, at any suitable point in transit, and/or after delivery to the point of destination.

4.2.2 *Factory inspection.*—The passing as satisfactory of any detail of processing or materials shall not relieve the contractor of responsibility for faulty workmanship or materials which may be discovered at any time prior to final acceptance.

4.2.3 *Final inspection.*—Unless otherwise specified, final inspection shall be made after delivery to the point of destination (see 6.4 and 6.5).

4.3 **Tests.**

4.3.1 *Chemical analyses.*—Unless otherwise specified, chemical analyses, if required by the purchaser, shall be made in accordance with the methods of the Association of Official Agricultural Chemists in effect on the date of the invitation for bids or in accordance with methods that give equivalent results.

5. PREPARATION FOR DELIVERY

5.1 **Packaging.**—Unless otherwise specified, commercial packaging is acceptable.

5.2 **Labeling.**—Any commercial labeling, or additional labeling, as specified, which complies with the Federal Food, Drug, and Cosmetic Act, and regulations promulgated thereunder, is acceptable.

5.3 **Packing.**—Unless otherwise specified, the product shall be packed in substantial commercial containers of the type, size, and kind commonly used for the purpose, so constructed as to insure acceptance and safe delivery by common or other carriers, at the lowest rate, to the point of delivery called for in the contract or purchase order.

5.4 **Marking for shipment.**—Unless otherwise specified, shipping containers shall be

Check the source to verify that this is the current version before use.

marked with the name of the product, quantity and size of packages in the container as defined by the contract or order under which the shipment is made, the name of the contractor, the number of the contract or order, the month and year of processing, and other pertinent information as specified by individual agencies.

6. NOTES

6.1 Ordering data.—Invitations for bids should state the style and grade of product required and size and kind of packaging required.

6.2 This specification does not include all styles and grades of canned apple juice that are commercially available but is intended to cover the grades of single-strength apple juice that are normally suitable for Federal Government requirements.

6.3 Bid samples.—If, for any particular purpose, samples with bids are necessary, they should be specifically asked for in the invitation for bids, and the particular purpose to be served by the bid sample should be definitely stated.

6.4 Contractor's inspection. — The contractor should be required to assure that the product conforms with the specification prior to submission to the Government for final inspection.

6.5 Destination inspection. — When the finished product has been inspected and passed at point other than destination, the contract should require that the product be inspected at destination for condition and quantity only.

Patent notice.—When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data, is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

7. DEPARTMENTAL REQUIREMENTS

7.1 The following specifications, standard, and other publication, of the issues in effect on date of invitation for bids, and special requirements, form a part of this specification for purchases made under this specification by the respective departments.

7.2 Army, Navy, and Air Force.

7.2.1 *Applicable specifications, standard, and other publication.*

Federal Specifications:

NN–B–621—Boxes; Wood, Nailed and Lock-Corner.

NN–B–631—Boxes; Wood, Wirebound (for Domestic Shipment).

LLL–B–631—Boxes; Fiber, Corrugated (for Domestic Shipment).

LLL–B–636—Boxes; Fiber, Solid (for Domestic Shipment).

Military Specifications:

MIL–C–1501—Canned Subsistence Items; Packaging and Packing for Overseas Shipment.

MIL–P–10225—Packaging of Glass Containers, One-Gallon Capacity and Smaller, for Other than Medicinal Products for Domestic Shipments.

Military Standard:

MIL–STD–129—Marking of Shipments.

Bureau of Supplies and Accounts Publication:

General Specifications and Conditions of Delivery Applying to Provisions Contracts.[1]

[1] Applicable to purchases for the Navy only.

(Copies of specifications, standards, and other publications required by the contractor in connection with specific procurement functions should be obtained from the procuring agency or as directed by the contracting officer.)

7.2.2 *Packing for domestic shipment.*

7.2.2.1 *Glass containers.*—Glass containers shall be packed in accordance with Military Specification MIL–P–10225.

7.2.2.2 *Cans.* — The cans of the product, arranged as specified in Military Specification MIL–C–1501, shall be packed on end in a snug-fitting corrugated or solid fiberboard box, nailed wood box, or wirebound wood box constructed in accordance with Federal Specification LLL–B–631, LLL–B–636, NN–B–621, or NN–B–631, respectively. Flaps of fiberboard boxes shall be securely sealed with an adhesive commercially used for the specific product being packed by application throughout the entire area of contact between the flaps or by a combination of stitching one set of flaps prior to packing and sealing the other flaps with the adhesive. When flaps are stitched, the stitches shall be distributed so as to fasten all flaps securely together over the entire area of contact between the inner and outer flaps and to prevent lifting of free edges and corners of outer flaps.

7.2.3 *Packing for overseas shipment.*—The product shall be packaged, labeled, and packed in accordance with the requirements of Military Specification MIL–C–1501.

7.2.4 *Marking.*—In addition to the marking specified in paragraph 5.4, shipping containers shall be marked in accordance with the requirements of Military Standard MIL–STD–129.

7.2.5 *Conditions of delivery (for Naval purchases only).* — Conditions for delivery shall be in accordance with General Specifications and Conditions of Delivery Applying to Provisions Contracts.

7.2.6 *Ordering data.*—Procurement documents should specify whether domestic or overseas shipment is required. (See 7.2.2 and 7.2.3.)

7.2.7 *Description of grades.*—The requirements of 3.4 shall apply, except that for Armed Forces purchases the minimum Brix requirement shall be 12.5° (at 20° C.). In addition, the minimum Brix-acid ratio shall be 25:1, and the maximum shall be 35:1.

NAVY INTEREST: *MC* Md S
