FEDERAL SPECIFICATION

JAMS (PRESERVES); FRUIT

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal Agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope. Fruit jams (preserves) are limited to the product as defined by the Definitions and Standards of Identity for Preserves or Jams Issued pursuant to the Federal Food, Drug, and Cosmetic Act.

1.2 Classification.

1.2.1 Types. Fruit jams (preserves) shall be of the following types, as specified (see 6.1):

Type I. Prepared from a single kind of fruit.

Type II. Prepared from a mixture of two or more kinds of fruit.

1.2.2 Styles. Fruit jams (preserves) shall be of the following styles, as specified (see 6.1):

Style 1. Contains fruit in substantially whole or partially whole form or large pieces of fruit.

Style 2. Contains fruit in crushed or macerated form.

1.2.3 Kinds. Fruit jams (preserves) shall be made from the following kinds of fruits (see 6.1):

FSC 8930

Check the source to verify that this is the current version before use.

Apple (type II only)
Apricot
Blackberry (seedless)
Blackberry (with seeds)
Boysenberry
Cherry
Currant, red
Damson plum
Elderberry
Fig
Gooseberry
Grape (Concord type)
Grape (other than Concord type)
Greengage plum
Guava
Loganberry
Nectarine
Peach, clingstone (yellow)
Peach, freestone (yellow)
Pear
Pineapple
Plum
Quince
Raspberry, black
Raspberry, red
Raspberry, red (of reddish-purple varieties)
Strawberry
Any others not mentioned

1.3 Grades. Fruit jams (preserves) shall be of the following grades, as specified (see 6.1):

US Grade A (US Fancy)
US Grade B (US Choice)

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issues in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein:

Federal Specifications:

Z-J-191	-	Jellies, Fruit
PPP-B-636	-	Boxes, Shipping, Fiberboard
PPP-C-29	-	Canned Subsistence Items, Packaging and Packing of.
PPP-G-460	-	Glass Containers, Filled and Closed; Packaging and Packing of.
PPP-I-350	-	Individual Servings of Subsistence; Packaging and Packing of.

Check the source to verify that this is the current version before use.

Federal Standard:

FED-STD-123 - Marking for Shipment (Civil Agencies).

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications and Standards, and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, US Government Printing Office, Washington, DC 20402.

(Single copies of this specification and other Federal Specifications required by activities outside the Federal Government for bidding purposes are available without charge from General Services Administration Business Service Centers, in Boston, New York, Philadelphia, Washington, DC, Atlanta, Chicago, Kansas City, MO, Fort Worth, Houston, Denver, San Francisco, Los Angeles, and Seattle, WA.

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the Index of Federal Specifications and Standards from established distribution points in their agencies.)

Military Specifications:

MIL-L-1497 - Labeling of Metal Cans for Subsistence Items.
MIL-L-35078 - Loads, Unit: Preparation of Nonperishable Subsistence.

Military Standards:

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage.
MIL-STD-668 - Sanitary Standards for Food Plants.

(Copies of Military specifications and standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

(Application for copies should be addressed to the Technical Division, Food Safety and Quality Service of the US Department of Agriculture, Washington, DC 20250.)

2.2 Other publications. The following document forms a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on date of invitation for bids or request for proposal, shall apply:

Association of Official Analytical Chemists

Official Methods of Analysis of the Association of Official Analytical Chemists

(Application for copies should be addressed to the Association of Official Analytical Chemists, P.O. Box 540, Benjamin Franklin Station, Washington, DC 20044.)

3. REQUIREMENTS

3.1 Materials. All materials shall be clean, sound and wholesome, and free from foreign odors, flavors, insect infestation or objectionable foreign matter.

Source: https://assist.dla.mil -- Downloaded: 202640-26T11:38Z
Check the source to verify that this is the current version before use.

3.2 Ingredients.

3.2.1 Fruit. The fruit jams (preserves) shall be prepared from clean, sound, mature, properly prepared, fresh, concentrated, frozen, and/or canned fruit and shall not be prepared from dried fruit. Apples, apricots, blackberries (seedless only), cherries, grapes, guavas, nectarines, peaches, pears, plums, and quinces shall be seeded, pitted, or stoned before preserving. Concord type grape jam shall be prepared from concord grapes or grapes exhibiting similar color and flavor characteristics, such as Campbell Early, Champion, Fredonia, Moore Early, Van Buren and Worden.

3.2.2 Sweetening ingredients. Sweetening ingredients may be any nutritive carbohydrate sweeteners in the quantities permitted by the Food and Drug Administration Standards of Identity for Preserves or Jams.

3.2.3 Optional ingredients. Any of the optional ingredients permitted by the Food and Drug Administration Standards of Identity for Preserves or Jams may be used except for sodium potassium tartrate and chemical preservatives which may be added, only to individual serving packages.

3.3 Description and determination of types, kinds, grades, and soluble solids. Unless otherwise specified, the interpretation and determination of requirements, including the descriptive terms contained in 1.2 and 1.3, shall be in accordance with the United States Standards for Grades of Fruit Preserves (or Jams), and Code of Federal Regulations, Title 21, Food and Drugs, Part 29, Fruit butters, fruit jellies, fruit preserves and related products, as modified by 3.3.1, and lot inspection and certification tolerances applicable thereto as set forth in the Regulations Governing Inspection and Certification of Processed Fruits and Vegetables and Related Products in effect on date of invitation for bids.

3.3.1 Type I. Type I fruit jams (preserves) shall be prepared from a single kind of fruit (see 1.2.3).

3.3.2 Type II. Type II fruit jams (preserves) shall be prepared from two or more kinds of fruit ingredients (see 1.2.3); the weight of each shall be not less than one-fifth of the total weight of the fruit combination except as follows:

(1) When pineapple is used, the weight of pineapple shall be not less than one-tenth of the total weight of the fruit combination.

(2) When apple is used, the weight of the apple shall be not more than one-half of the total weight of the fruit combination.

Source: https://assist.dla.mil -- Downloaded: 202640-26T11:38Z
Check the source to verify that this is the current version before use.

3.3.3 The US Grade A (US Fancy) consistency factor requiring the use of whole or almost whole, halves, slices, or pieces of apricot, cherry, gooseberry, peach, pineapple, and strawberry in Type I or Type II fruit jams (preserves) is waived for 1-1/2 ounce (42.5 grams) 211 x 011 size cans and for one-half to two ounce cup and boat containers.

3.4 Finished product requirements. Unless otherwise specified, the interpretation and determination of requirements, including descriptive terms and recommendations, shall be in accordance with the United States Standards for Grades of Fruit Preserves (or Jams), except as modified herein, and lot inspection and certification tolerances applicable thereto, as set forth in the Regulations Governing Inspection and Certification of Processed Fruits and Vegetables and Related Products.

3.4.1 Chemical requirements (Military agencies). The finished product on a lot average basis, shall meet the following minimum requirements (see 4.4.1).

TABLE I. Chemical requirements

Kind of fruit 1/ 2/	Ash percent	K_2O mg per 100 grams	P_2O_5 mg per 100 grams
Apricot	0.305	176.3	21.1
Blackberry (w/seeds)	.169	82.5	13.8
Cherry	.170	93.2	16.8
Plum, Damson	.209	112.6	9.0
Grape, (Concord)	.188	98.2	10.7
Loganberry	.177	85.0	11.8
Peaches	0.167	91.7	16.1
Pineapple	0.144	66.6	5.4
Plum, Italian	0.155	82.0	12.9
Raspberry (Red)	.168	82.6	15.1
Raspberry (Black)	.186	94.6	11.9
Strawberry	.154	79.7	10.5

1/ Chemical requirements are applicable only to the listed kinds of jam.

2/ Type II finished product shall contain the above constituents in amounts proportionate to the fruits in the mixture.

Source: https://assist.dla.mil -- Downloaded: 202610-26T11:38Z
Check the source to verify that this is the current version before use.

3.5 Federal Food, Drug, and Cosmetic Act. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

3.6 Workmanship. The product shall be prepared in accordance with Code of Federal Regulations, Title 21, Food and Drugs, Part 128, Human foods; current good manufacturing practice (sanitation) in manufacture processing, packing, or holding. For Military agencies the product shall be processed in establishments meeting the requirements of MIL-STD-668.

3.6.1 Containers. The product shall be sufficiently processed by heat to assure preservation in hermetically-sealed containers as specified. Containers shall be sound and clean; and, unless otherwise specified, the filled food containers shall conform to the applicable provisions of the US Standards for Condition of Food Containers.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Certification. Unless otherwise specified (see 6.1), the contractor is required to furnish an official inspection certificate issued by the US Department of Agriculture certifying that the grade of the product supplied is as required by the contract or order.

4.2 Plant qualification.

4.2.1 Civil agencies. When specified (see 6.1), inspection of plants producing the product will be conducted upon request of the contracting officer to the appropriate Government inspection agency. Award of contract will be limited to establishments known to maintain proper sanitary conditions or which have received prior sanitary approval recommended by the inspection agency.

4.2.2 Military agencies. The product shall be rejected if produced in plants not meeting the requirements of 3.6.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:38Z
Check the source to verify that this is the current version before use.

4.3 Quality conformance inspection.

4.3.1 Condition inspection of containers. When inspection of product for quality and condition is performed by the US Department of Agriculture, the United States Standards for Condition of Food Containers shall apply. (For applicable criteria governing inspection of containers for Military agencies (see 4.3.4.3)).

4.3.2 Sampling for inspection. Sampling for inspection shall be performed in accordance with MIL-STD-105, except where otherwise indicated hereinafter.

4.3.3 Component and material inspection. In accordance with 4.1, components and material shall be inspected in accordance with the requirements of referenced specifications, drawings and standards unless otherwise excluded, amended, modified or qualified in this specification or applicable purchase documents.

4.3.3.1 Examination of materials and ingredients. Examination of materials and ingredients shall be made to determine compliance with the condition and identity requirements of 3.1, and 3.2. Determination of compliance with identity requirements shall be ascertained by examination of labels, invoices or other valid documents.

4.3.3.2 In-process examination. Unless otherwise specified (see 6.1), examination shall be performed during processing to determine conformance to 3.3 as concerns kinds and quantity of ingredients being utilized in the production of the finished product. Formulation records shall be maintained. Nonconformance shall be cause for rejection of the involved finished product.

4.3.4 Examination of end item. A lot shall consist of not more than one kind of jam unless an assortment is specified (see 5.2.3 and 6.1).

4.3.4.1 Examination of net weight. The end item shall be examined for net weight as specified in table II. The sample unit shall be one jar or can, and the lot size shall be expressed in jars or cans. The inspection level shall be S-3 and the acceptable quality level (AQL) shall be 1.5 expressed as percent defective.

Source: https://assist.dla.mil -- Downloaded: 202610-26T11:38Z
Check the source to verify that this is the current version before use.

TABLE II. Examination of net weights (cans or jars) 1/

Category	Defect
Minor	
201	Net weight more than 5 percent under specified net weight (applicable to containers required to have a net weight of 16 ounces (454 grams) or less)). 2/
202	Net weight more than 2 percent under specified net weight (applicable to containers required to have a net weight of more than 16 ounces (454 grams)). 3/

1/ Lot shall be rejected if sample data indicates lot average net weight is less than specified net weight.

2/ Weigh to nearest 1/10 ounce (nearest 1 g).

3/ Weigh to nearest 1/4 ounce (nearest 1 g).

4.3.4.2 Examination for product grade. The examination for grade shall be in accordance with the United States Standards for Grade of Fruit Preserves (or Jams). A grade lower than that specified shall be cause for rejection of the lot.

4.3.4.3 Examination of primary container. The examination of primary containers for condition and labeling shall be in accordance with the United States Standards for Condition of Food Containers. Examination of cans for vacuum and interior enamel shall be in accordance with the applicable quality assurance provisions of PPP-C-29.

4.3.4.4 Examination of preservation and packing for individual servings. Examination shall be in accordance with the end item examination criteria in PPP-I-350, except that for level C pack, only the examination criteria for net weight and shipping containers shall apply. When an assorted pack has been specified, examination shall be conducted to insure that apple and mixed fruit units do not exceed 40 percent of the total and that the required kinds are included. Lot size shall be expressed in shipping containers with an inspection level of S-2. The lot shall be rejected if sample data average indicates that the combination of apple and mixed fruit units exceed 40 percent of the total or if the required kinds have not been included.

Source: https://assist.dla.mil -- Downloaded: 202610-26T11:38Z
Check the source to verify that this is the current version before use.

4.3.4.5 Examination for packing and shipping containers for cans. Examinations shall be in accordance with the applicable quality assurance provisions in PPP-C-29.

4.3.4.6 Examination for packing and shipping containers for glass containers. Examinations shall be in accordance with the quality assurance provisions for the end item, as contained in PPP-G-460.

4.3.4.7 Examination of shipping containers with individual servings. Examination shall be in accordance with the quality assurance provisions of PPP-I-350, as qualified for count, arrangement of contents and closure of shipping container. In conjunction with the examination for closure, the following defect shall be included in the examination: Major - NSN contract number, nomenclature and date of pack marking are missing, incorrect or illegible. Minor - other required markings are missing, incorrect, or illegible. For level C packing only the defect for marking shall apply.

4.3.4.8 Examination of unit loads. Examination shall be in accordance with the quality assurance provisions of MIL-L-35078.

4.3.5 Sampling procedure and acceptance criteria for testing of finished product (Military agencies). Procedure for testing for ash, potassium oxide (K_2O) and phosphorus pentoxide (P_2O_5) shall be in accordance with 4.4.1. Requirements shall be applicable to the lot average. The sample unit shall be approximately a 1-pound (454 g) composite derived from nine primary containers or from each primary container if there are less than nine in a lot. The lot size shall be expressed in primary containers. Results shall be reported to the nearest unit or decimal specified for the requirements. A test failure shall be cause for rejection of the lot.

4.4 Test methods. Test procedures and controls which differ from those specified herein, may be used by the contractor if they provide a quality assurance equivalent to that specified. If the Government contracting officer determines that such procedures and controls do not provide, as a minimum, such quality assurance, the contractor will use the test procedures set forth herein. In case of dispute as to test results, the test methods specified herein will govern.

4.4.1 Chemical analyses. Chemical analyses, if required by the purchaser, shall be made in accordance with the methods outlined in the Official Methods of Analysis of the Association of Official Analytical Chemists, as follows:

Source: https://assist.dla.mil -- Downloaded: 202610-26T11:38Z
Check the source to verify that this is the current version before use.

Test	Source	Method
Ash, percent	Chapter: Fruit and Fruit Products Section: Ash	
Potassium oxide (K_2O) mg/100g	Chapter: Fruit and Fruit Products Section: Potassium	Rapid Flame Photometric
Phosphorus pentoxide (P_2O_5) mg/100g	Chapter: Fruit and Fruit Products Section: Phosphorus	Volumetric

5. PACKAGING

5.1 Preservation. Preservation shall be as specified in 5.1.1, 5.1.2, or 5.1.3, as specified (see 6.1).

5.1.1 Metal cans. The product shall be unit packed in metal cans of a size and level specified in PPP-C-29.

5.1.2 Glass containers.

5.1.2.1 Level A. Ten, twelve, twenty, twenty-two or thirty-two avoidupois ounces (283, 340, 567, 624 or 907 g) of fruit jams (preserves) shall be unit packed in a glass jar of the type used commercially for the product. The jar shall be sealed with one of the closures specified in 5.1.2.1.1 or 5.1.2.1.2 (see 6.1).

5.1.2.1.1 Hermetic-friction type closure. The closure shall be a hermetic-friction type side seal closure with a pry-off feature. The closure shall be made from commercial 0.50 pound per base box (11.2 g/m^2) electrolytic tinplate and shall be fitted with a liner and facing material suitable for the product and shall be coated outside with a corrosion-resistant enamel and inside with an enamel suitable for the product. The closure shall be equipped with a gasket made from material normally used for the product.

5.1.2.1.2 Vacuum, twist-off cap. The closure shall be a vacuum, twist-off cap coated inside with an enamel suitable for the product. The inside of the cap shall have a suitable sealing compound to effect a hermetic closure.

5.1.2.2 Level C. The amount of fruit jams (preserves) specified in the procurement document shall be unit packed in glass jars which will afford adequate protection against damage and deterioration during shipment from the supply source to the first consuming activity. The contractor may use his standard practice when it meets this requirement.

Source: https://assist.dla.mil -- Downloaded: 202610-26T11:38Z
Check the source to verify that this is the current version before use.

5.1.3 Individual servings, level B and C. Individual servings of jam shall be unit packed in accordance with the level B or C requirements of PPP-I-350, as specified (see 6.1).

5.2 Packing. The product shall be packed in accordance with 5.2.1, 5.2.2, or 5.2.3, as specified (see 6.1).

5.2.1 Metal cans. Cans of fruit jams (preserves) shall be packed in accordance with PPP-C-29 for level A, B, or C as specified (see 6.1).

5.2.2 Glass jars. Glass jars of fruit jams (preserves) shall be packed in accordance with level A, B, or C, as specified (see 6.1) of PPP-G-460. Alternatively, twelve, 10, or 12 ounce (284 or 340 g) jars of product shall be packed in a shipping container.

5.2.3 Individual servings. Individual servings of fruit jams (preserves) shall be packed in accordance with level B or C of PPP-I-350, as specified (see 6.1). When specified (see 6.1), assorted types and styles of fruit jams (preserves) may be packed in the same shipping container. Individual servings of fruit jellies conforming to Z-J-191 may be included in the assortment. However, not more than 40 percent of the assorted pack may be apple or mixed fruit units or a combination of the two. The assortment shall consist of at least three kinds including strawberry or raspberry (black or red) and grape or cherry.

5.2.4 When specified (see 6.1 and 6.6), the shipping container shall be reinforced with non-metallic strapping or pressure-sensitive filament reinforced tape in accordance with appendix of PPP-B-636.

5.3 Unit loads. When specified (see 6.1), the product packed as specified in 5.2 shall be arranged in unit loads in accordance with MIL-L-35078 for the type and class of load specified.

5.4 Labeling and marking.

5.4.1 Any kind of fruit jams (preserves) for which a standard of identity has not been promulgated under the Federal Food, Drug, and Cosmetic Act shall bear appropriate labeling as to its ingredients in accordance with the Act and regulations thereunder.

5.4.2 Civil agencies.

5.4.2.1 Unit containers. Unless otherwise specified, labeling shall comply with all applicable provisions of the Federal Food, Drug, and Cosmetic Act and the regulations promulgated thereunder, and with such additional labeling as required by the procuring agency or cited in the packaging specifications referenced herein.

Source: https://assist.dla.mil -- Downloaded: 202640-26T11:38Z
Check the source to verify that this is the current version before use.

5.4.2.2 Shipping containers. Unless otherwise specified, marking shall be in accordance with FED-STD-123, and as augmented in the packaging specifications referenced herein.

5.4.2.3 Special labeling. If a dietetic product is specified, the labeling shall comply with the special dietary labeling regulations at the Federal Food, Drug, and Cosmetic Act.

5.4.3 Military agencies. Labeling of unit containers and marking of shipping containers shall be in accordance with 5.4.3.1, 5.4.3.2, or 5.4.3.3, as applicable.

5.4.3.1 Glass jars. Unless otherwise specified, commercial labeling shall be acceptable for glass jars. Shipping containers shall be marked in accordance with MIL-STD-129 and PPP-G-460.

5.4.3.2 Cans. Cans shall be labeled in accordance with MIL-L-1497. Shipping containers shall be marked in accordance with MIL-STD-129.

5.4.3.3 Individual servings. Individual servings shall be labeled in accordance with PPP-I-350. Shipping containers shall be marked in accordance with MIL-STD-129.

5.4.4 Unit loads. Unit loads shall be marked in accordance with MIL-L-35078.

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents:

(a) Title, number, and date of this specification.
(b) Type, style, kind, and grade of product desired (see 1.2 and 1.3).
(c) When official inspection certificate is not required (see 4.1.1).
(d) Type and size of container required (see 5.1.1, 5.1.2, and 5.1.3).
(e) Level of preservation and packing required (see 5.1 and 5.2).
(f) Type and class of unit load required when specified (see 5.3).
(g) When packing specified in 5.2.4 is required (see 5.2.4 and 6.6).
(h) When in-process examination is not required (see 4.3.3.2).
(i) When an assorted pack is desired (see 5.2.3).
(j) When plant inspection is required by Civil agencies (see 4.2.1).

Source: https://assist.dla.mil -- Downloaded: 202640-26T11:38Z
Check the source to verify that this is the current version before use.

6.1.1 Artificially sweetened (dietetic) fruit jams (preserves). Artificially sweetened fruit jams (preserves) are not covered by this specification. Such items, when needed, may be purchased from qualified suppliers on the basis of special applicable requirements.

6.2 This specification does not include all grades of fruit jams (preserves) that are commercially available, but is intended to cover the grades that are normally suitable for Federal Government requirements.

6.3 Supplier's inspection. The supplier should be required to assure that the product conforms with the specification prior to submission to the Government for final inspection.

6.4 Destination inspection (Civil agencies only). When the finished product has been inspected and passed at a point other than destination, the contract should require that the product be inspected at destination for condition and quantity only.

6.5 Packing specified in 5.2.4 is intended for transfer at sea operations or special overseas operations.

6.6 Military agencies. Based on the conditions known or expected to be encountered during shipment handling and storage of the specific item being procured, the contracting officer should select the appropriate level of pack in accordance with the criteria established in AR 700-17/NAVSUPINST 4030.28/AFR 71-6/MCO 4030.14D/DSAR 4145.7.

6.7 Metric equivalents. Metric equivalents, indicated in parentheses throughout this document, are based on practices, conversion factors, and symbols specified in ASTM E 380 Standard for Metric Practice, and are for information only. In each instance, the value stated in US customary units shall be controlling.
