ABSTRACT

This bulletin is published to promote the mutual sharing of technical expertise for the purpose of increasing productivity and efficiency. It combines the indexes of guide specifications published by the American Institute of Architects, the Construction Sciences Research Foundation (CSRF), and several Federal agencies.

The first section lists the guide specification by the section numbers assigned by the agency that prepared the guide specification. A Construction Specifications Institute (CSI) MasterFormat number, as applied in the second section, is included for each guide specification, as a cross reference.

The second section lists the guide specifications grouped by CSI MasterFormat number. The specifications have been grouped based on interpretation of their subject matter as indicated by their titles. The groupings are selected to place guide specifications with similar subject matter into reasonably sized groupings under the appropriate range of CSI MasterFormat number, usually a mediumscope designation.

The third section puts the listing of the second section into matrix format.

FOREWORD

This bulletin has been developed from the indexes of the various guide specification series, published by the contributing groups. The cooperation of the American Institute of Architects, the Construction Specifications Institute, and the Federal Agencies, in providing the indexes of their documents and for authorizing their listings in this matrix, is greatly appreciated.

Design cannot remain static any more than can the functions it serves or the technologies it uses. Accordingly, recommendations for improvement are encouraged and should be furnished to Commander, Naval Facilities Engineering Command (Code DSO2), 200 Stovall St., Alexandria, VA 22332, telephone (202) 325-0450.

THIS BULLETIN SHALL NOT BE USED AS A REFERENCE DOCUMENT FOR PROCUREMENT OF FACILITIES CONSTRUCTION. IT IS TO BE USED IN THE PURCHASE OF FACILITIES ENGINEERING STUDIES AND DESIGN (FINAL PLANS, SPECIFICATIONS, AND COST ESTIMATES). DO NOT REFERENCE IT IN MILITARY OR FEDERAL SPECIFICATIONS OR OTHER PROCUREMENT DOCUMENTS.
