DATA ITEM DESCRIPTION

Title: PERFORMANCE ANALYSIS REPORT

Number: DI-SESS-81938A
AMSC Number: N10465
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20240408
Limitation: N/A
GIDEP Applicable: N/A
Project Number: SESS-2024-017

Use/relationship: Performance analysis report is the primary documentation for system level modeling and simulation analysis performed during design of equipment. Within this document reside the methods, assumptions, and results for system level performance analysis.

This DID contains the format, content, and intended use information for the data product resulting from the work task described in the contract Statement of Work (SOW).

This DID supersedes DI-SESS-81938.

Requirements:

1. Reference documents. None.

2. Format. Contractor format.

3. Content.

3.1. Title Page, containing the following:

3.1.1. Title/identification of the system/component/program/project.

3.1.2. Title of CDRL and CDRL number.

3.1.3. Contract number.

3.1.4. Preparing activity or contractor's title.

3.1.5. Security classification, when required.

3.1.6. Distribution Statement.

3.2. Table of Contents. The document shall contain a table of contents providing the number, title, and page number of each titled paragraph, figure, table, and appendix.

3.3. Scope. This section shall be divided into the following paragraphs:

3.3.1. Identification. This paragraph shall contain a full identification of the system and the components to which this document applies, including, as applicable, part numbers.

Check the source to verify that this is the current version before use.

3.3.2. System overview. This paragraph shall briefly state the purpose of the system and the components to which this document applies. It shall describe the general nature of the system and components of interest; summarize the history of system development, operation, and maintenance; identify the project sponsor, acquirer, user, developer, and support agencies; identify current and planned operating sites; and list other relevant documents.

3.3.3. Document overview. This paragraph shall summarize the purpose and contents of this document and shall describe any security or privacy considerations associated with its use.

3.4. Referenced documents. This section shall list the number, title, revision, and date of all documents referenced in this document. This section shall also identify the source for all documents not available through normal Government stocking activities.

3.5. General approach. This section shall detail the general approach for assessing system capability with respect to governing performance requirements. This section shall also include what software tools are used for which assessing which requirements.

3.6. Analytical Plan. This section shall detail the cases to be analyzed and justification for selection and or exclusion. This section shall justify grouping of analysis for simplification if applicable.

3.7. Physics based methods. This section shall provide description and justification for all physics based calculations and processes used within the performance assessment.

3.8. Rule based methods. This section shall provide description and justification for all rule based calculations and processes used within the performance assessment.

3.9. Assumptions. This section shall list all relevant assumptions and provide justification. As necessary sensitivities to demonstrate, significance of parameters shall be provided in this section.

3.10. Results. This section shall provide results of analysis. This shall include relevant tables, figures, and conclusions.

3.11. Software artifacts. This section shall include all source code, macros, or other mechanisms required to conduct the performance assessment.

3.12. Notes. This section shall contain any general information that aids in understanding this document (e.g., background information, glossary, rationale). This section shall include an alphabetical listing of all acronyms, abbreviations, and their meanings as used in this document and a list of any terms and definitions needed to understand this document.

3.13. Appendixes. Appendixes may be used to provide information published separately for convenience in document maintenance (e.g., charts, classified data). As applicable, each appendix shall be referenced in the main body of the document where the data would normally have been provided. Appendixes may be bound as separate documents for ease in handling. Appendixes shall be lettered alphabetically (A, B, etc.).
