COMMERCIAL ITEM DESCRIPTION

BRUSHES, GREASE, COOKING AND BAKING

The General Service Administration has authorized the use of this Commercial Item Description in preference to MIL-B-1995, for all federal agencies.

1. SCOPE

1.1 Scope. This commercial item description covers grease brushes, for cooking and baking.

1.2 Classification. The grease brushes shall be in the following sizes (see 5.2):

Size 1 - 1-1/2 inches wide
Size 2 - 3 inches wide

2. SALIENT CHARACTERISTICS

2.1 Design and construction. The grease brush shall be flat, and contain bristles that are enclosed in a ferrule which is attached to the handle, and shall conform to the following dimensions:

Characteristics	Inches
Length of handle above ferrule	5 to 5-5/8
Thickness inside ferrule	7/16 to 9/16
Length of bristles outside ferrule	2-1/4 to 2-1/2
Overall length of brush	8-3/4 to 9-5/8

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be used in improving this document should be addressed to: Commander, U.S. Army Natick Research, Development, and Engineering Center, ATTN: SATNC-WEE, Natick, MA 01760-5018 by using the Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

AMSC N/A FSC 7330

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

2.2 Bristles. The grease brush bristles shall be natural color hog bristles or synthetic filament fibers as specified (see 5.2). The contractor shall certify that the hog bristles of synthetic filaments are safe for repeated use in food service applications.

2.3 Ferrule. The ferrule on the grease brush shall be non-combustible, and non-corrosive.

2.4 Handle. The grease brush shall have a laminated wood or plastic handle. Use of nails, staples or tacks is prohibited when fastening handle to the ferrule.

2.5 Identification marking. The handle of each brush shall be permanently and legibly marked with the manufacturer's identification marking. Use of a "stick-on" or removable label is prohibited.

3. QUALITY ASSURANCE

3.1 Certification. The contractor shall certify, and maintain substantiating evidence, that the product offered meets the salient characteristics and requirements of this Commercial Item Description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

3.2 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within specified tolerance using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this Commercial Item Description are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerance specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

3.3 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

3.4 End item examination. The contractor is responsible for assuring that the product offered conforms to the stated requirements. Sample inspection shall be in accordance with MIL-STD-105. The inspection level shall be II. The sample unit shall be one complete end item. The finding of any of the following defects shall be cause for rejection of the lot.

Not in accordance with design requirements
Handle splintered or rough
Varnish or lacquer not transparent
Handle not covered or poorly covered with varnish or lacquer
Any part missing (except when otherwise classified herein)
Burrs, rough edges, or slivers on metal parts
Setting compound (synthetic resin) beyond ferrule
Loose fit of ferrule to bristle or filament assembly
Bristles or filaments loose in the setting compound
Loose fit of ferrule to handle
Identification marking is missing, incomplete, not legible, not in proper location

4. PACKAGING

4.1 Packaging and packing. Packaging and packing shall be commercial or as specified (see 5.2).

4.2 Commercial packaging and packing. Each brush shall be cleaned, preserved, packaged, packed, and unitized in accordance with ASTM D 3951.

4.3 Marking (commercial). Marking of unit pack, shipping container, and unit load shall be in accordance with ASTM D 3951.

5. NOTES

5.1 Intended use. The grease brush is intended for coating baking pans, cooking pans, and utensils with oil or shortening; and for applying a "wash" or glaze to bakery products such as bread or rolls.

5.2 Acquisition requirements. Acquisition documents must specify the following:

a. Title, number, and date of this commercial item description.
b. Size of brush required (see 1.2).
c. Type of bristles required (see 2.2).
d. Type of packaging and packing required (see 4.1).

5.3 Sources for documents.

5.3.1 Sources for non-Government association documents.
