COMMERCIAL ITEM DESCRIPTION

BARBER KIT, WITH PLASTIC CASE

The General Services Administration has authorized the use of this commercial item description as a replacement for MIL-B-1771 for all federal agencies.

1. SCOPE

1.1 Scope. This commercial item description covers a barber kit with plastic case for use by military personnel in the field.

2. SALIENT CHARACTERISTICS

2.1 Components of the barber kit. The barber kit shall have the following components and the quantity required:

Component	Quantity/kit
1. Case, barber kit	1
2. Clipper, hand, hair, size No. 0	1
3. Blade set, clipper, hand, hair, size No. 0	1
4. Barber's cloth	1
5. Clipper, electric, hair, with accessories:	1
Blade, size 1	1 each
Blade, size 000	1 each
Blade, guard	1 each
Brush, blade cleaning	1 each
Brush set, carbon,(set of 2, if required)	1 each
Container of oil	1 each
Operating and maintenance instructions	1 each
6. Blade adapter, "Butch type" for electric clipper	1

Beneficial comments recommendations, additions, deletions, clarifications, etc. and any pertinent data which may be used in improving this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor St., Fort Worth, TX 76102-6114.

AMSC N/A FSC 3590

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

7. Shears, barber's	2
8. Cream, shaving brushless	1
9. Germicide, 2 oz bottle	2
10. Disposable razors	80
11. Comb, hair	2
12. Soap, 3-1/4 oz bars	2
13. Soapbox	1
14. Disinfectant tray	1

2.1.1. Barber kit Case. The barber kit case shall be made of polyethylene or copolymer polypropylene plastic and constructed so as to contain a separate internal nesting tray made of the same material, and having a minimum depth of one (1) inch. The nesting tray shall have the same width and length as the inside of the barber kit case. The internal tray shall not cause bulging, distortion, or prevent the lid from closing when seated in the barber kit case. The barber kit case dimensions shall be 12 to 16 inches long, 7.5 to 9.5 inches wide, and 5 to 8 inches high. The barber kit case shall have a hinged cover and gasket, which makes the case water tight when closed. The case shall have a minimum of one handle and one latch and be designed to be padlocked. All hardware shall be either plastic or stainless steel to prevent corrosion. The case shall be a subdued color (black or gray) and shall be supplied with a weather resistant padlock and two keys (see 6.4).

2.1.2 Clipper, hand, hair. The hand hair clipper shall be commercial size No.0 designed to cut hair to 1/32 inch long. It shall consist of cutting blades, handles, compression cap, and a blade guard. The clipper shall operate without binding, remain in an open position from the spring pressure, and the handle shall have a suitable finger rest.

2.1.3 Blade set, clipper, hand, hair. The blade set shall be size No.0 and shall be the manufacturer's standard commercial product. The blade set shall be designed to cut hair 1/32 inch long and compatible with the model of hand clipper furnished (see 2.1.2).

2.1.4 Barber's cloth The barbers cloth shall be a dark green cotton or nylon cloth, be a minimum size of 40 inches by 40 inches, and all cut edges hemmed.

Check the source to verify that this is the current version before use.

2.1.5 Clipper, electric, hair. The electric hair clipper shall be made from high impact resistant plastic, operate on 115 volts, 25 to 60 cycle, AC-DC single phase, and have a speed of 1700 to 2900 strokes per minute. The clipper shall be equipped with a detachable cutter head, a method for hanging the clipper when not in use, an 8 foot cord set (with a strain relief at the entry to the motor housing), and the assembled weight shall not exceed 2 pounds. The clipper shall be supplied with 2 blades, a size 1 and a size 000, a blade guard, a blade cleaning brush, a container of oil, a set of replacement carbon brushes (if applicable), and operating and maintenance instructions.

2.1.6 Blade adapter, hair, electric. A "Butch Type", size 3-1/2, to be used with the electric hair clipper (see 2.1.5)

2.1.7 Shears, barber's. The barber shears shall conform to A-A-2887.

2.1.8 Cream, shaving brushless. The shaving cream shall be the brushless type and supplied in 4-1/2 ounce tubes.

2.1.9 Germicide. The germicide shall be a quaternary ammonium type liquid disinfectant, with a 10 percent active product in 2-ounce plastic bottles.

2.1.10 Disposable razors. The razors shall be made of plastic with stainless steel blades and be disposable.

2.1.11 Comb, hair. The comb shall be barber style, professional, 7-1/4 inch minimum length with half fine and half coarse teeth. The comb shall be any subdued color.

2.1.12 Soap bar. The bar soap shall be soft all-purpose type, 3-1/2 ounce minimum, (personal size) for bathing, shaving, hand washing, and cleaning.

2.1.13 Soapbox. The soapbox shall be made of plastic and accommodate a 3-1/2 ounce personal size bar of soap.

2.1.14 Disinfectant tray. At the manufacturer's option, a seamless aluminum or seamless plastic polyethylene or copolymer polypropylene (black or gray) tray shall be furnished. The tray shall be resistant to the germicide, and be approximately 7-1/4 inches long, 4-1/2 inches wide, and 2-1/2 inches high.

2.2 Component kit label("Government unique" requirement). A list of the kit components shall be printed on an adhesive backed waterproof white label with waterproof ink. This label shall be securely attached to the inside of the barber kit case cover and contain the following information:

Item	NSN	Quantity
Case, plastic	3590-00-240-2926	1
Hand hair clipper	3590-00-170-8462	1
Hand clipper blade set	none	1
Barber's cloth	3590-00-162-5630	2
Electric hair clipper	3590-00-892-4525	1
Barber shears	3590-00-161-6913	2
Shaving cream	8520-00-285-4960	1
Germicide	none	1
Disposable razors	8530-00-347-9577	80
Barber hair comb	8530-00-543-7727	2
Bar soap	8530-00-129-0803	2
Soapbox	8530-00-261-8275	2
Disinfectant tray	3590-00-926-3838 (for aluminum) none for plastic	1

2.3 Instruction label ("Government unique" requirement). The instructions for care of the tools shall be printed on an adhesive backed waterproof white label with waterproof ink. This label shall be securely attached to the inside of the barber kit case cover next to the kit listing of components. These instructions shall read as follows:

"INSTRUCTIONS FOR THE CARE OF THE BARBER KIT TOOLS

Sterilization. Keep all parts of equipment clean. Detach cutter head from electric clipper and brush away debris. Immediately after use on each patron, wash the clippers, comb, blades, electric clipper detachable cutter head, and shears with soap and water to remove all film and debris. After washing, all instruments shall be immersed for 15 minutes in a disinfectant solution prepared in accordance with the manufacturers recommended instructions. All disinfected instruments shall be rinsed in water after immersion to remove the chemical, and then dried prior to use. Change the solution daily, dry all items prior to storage.

Sharpening. Do not attempt to sharpen blades in the field, replace with extra set and exchange for new set.

Check the source to verify that this is the current version before use.

Care. Protect all metal items from rusting by using a light film of oil when kit is not to be used for several days. Protection is most important in humid climates."

2.4 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within the tolerances specified and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

3. REGULATORY REQUIREMENTS

3.1 Contractor recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS

4.1 Contractor certification. The contractor shall certify, and maintain substantiating evidence, that the components offered meets the salient characteristics and requirements of this Commercial Item Description, and except for any Government unique requirements specified, conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4.2 Market acceptance criteria. No item of equipment offered under this CID shall be acceptable unless the manufacturer has sold equipment of the same size (similar capacity) and type in a commercial environment for a minimum period of one year. The sales results shall be statistically supported and sales data shall accompany bid proposals. Equipment installed for test purposes in a manufacturer's plant or test laboratory shall not be considered as complying with this requirement.

5. PACKAGING

5.1. Packaging, packing and marking. Packaging, packing, and marking shall be specified in the contract or purchase order (see 6.1).

Check the source to verify that this is the current version before use.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Acquisition requirements. Acquisition documents must specify the following:

a. Title, number and date of this document.
b. Packaging requirements (see 5.1)

6.2 "Government unique" requirements. Whenever a "Government unique" requirement is included in the title of a paragraph under "Salient Characteristics", it is meant that the requirement is something that is not normally offered to the commercial marketplace by the manufacturer.

6.3 Source for Government documents. Copies of federal documents are available from:

Standardization Documents Order Desk
Building 4D
700 Robbins Avenue
Philadelphia, PA 19111-5094

6.4 Alternate case closure. Past experience has shown that a commercial padlock (w/2 keys) with clevis and chain attached to the case in accordance with manufacturer's commercial practice was found to be acceptable.
