COMMERCIAL ITEM DESCRIPTION

PANS: MIXING AND CLEANING

The General Services Administration has authorized the use of this commercial item description in preference to Military specification MIL-P-52783A(ME).

This description covers two types of zinc-coated steel, fiberglass, or aluminum pans. Type I is to be used for mixing paints to be used in silk screen painting. Type II is intended to be used for cleaning items used in silk screen painting.

Salient characteristics:

Design:

Description: The pans shall be as specified herein. The size shall not exceed the limitations specified in figures 1 and 2.

Classification: Pans shall be of the following types and sizes, as specified:

Type I - Pans, mixing; 8 inches in width; 8 inches in length; 2 inches in depth.

Type II - Pans, cleaning; 24 inches in width; 23 inches in length; 2 inches in depth.

Material: Pans type I and II shall be fabricated from zinc-coated steel, aluminum or fiberglass. The metal shall be corrosion resistant or coated to be made corrosion resistant.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and other data which may improve this document should be sent to: CMDR, US ARMY BELVOIR RDE CTR, ATTN SATBE TSE, 10101 GRIDLEY RD, STE 104, FT BELVOIR VA 22060-5818.

AMSC N/A FSC 3610

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Workmanship: The metal used in fabrication shall be free from kinks and sharp bends. The straightening of material shall be done by methods that will not cause injury to the material. Corners shall be square and true. All bends shall be made with controlled means to ensure uniformity of size and shape. External surfaces shall be free of burrs, sharp edges or corners except where sharp edges or corners will not be a hazard to personnel.

Certification of commercial item. The contractor shall certify that the product offered to the Government meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product as the manufacturer's current product offered by the contractor in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within specified tolerances using conversion tables contained in the latest revision of FED-STD-376, and all other requirements of this commercial item description are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Regulatory requirements. In accordance with Federal Acquisition Regulation, section 23.403, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing the contractor's employees to undue hazards from the recovered materials.

Preservation, packing, and marking. Preservation, packing, and marking shall be as specified in the contract or order.

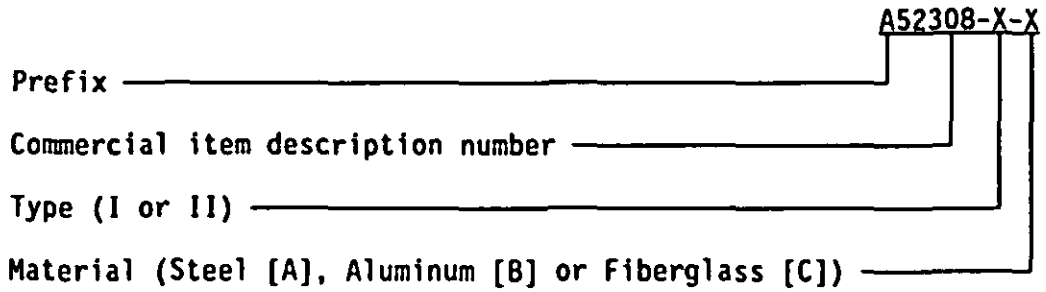

Quality assurance: Prior to full scale production, the contractor will furnish to the Government representative, one mixing and cleaning pan for first piece inspection for examination of the following defects. Presence of one or more defects shall be cause for rejection. After the Government authorizes production, each production mixing and cleaning pan shall also be examined for these defects.

1. Design not as specified.
2. Material not as specified.
3. Type not as specified.
4. Dimensions not as specified.
5. Workmanship not as specified.

CID based part identification number. The following part identification numbering procedure is for Government purposes and does not constitute a requirement for the contractor.

Part or identifying number (PIN). The PIN to be used for pans acquired to this commercial item description are created as follows:

Notes. The procuring agency should specify the preferred options permitted herein and include the following information in procurement documents:

1. Title, number, and date of this item description.
2. Classification (size) and material required.
3. Certification that the model offered meets all requirements of this item description.
4. When this commercial item description is used for procurement, the commercial item certification clause must appear in the solicitation.

The following are suggested sources of supply for this item description (Competition is not limited to these sources):

1. McMaster-Carr
   P.O. Box 440
   New Brunswick, NJ 08903

2. Soiltest, Inc.
   2205 Lee St.
   Evanston, Il 60202

FED-STD-376 is available from: STDZN DCMNT ORDER DESK, BLDG 4D, 700 ROBBINS AVE, PHILADELPHIA PA 19111-5094.

The preparing activity for this CID is: US ARMY BELVOIR RDE CTR, ATTN SATBE TSE, 10101 GRIDLEY RD STE 104, FT BELVOIR VA 22060-5818.
