DATA ITEM DESCRIPTION

Title: SPECIALIZED REUSABLE CONTAINER DESIGN CANDIDATE TECHNICAL DATA PACKAGE (TDP)

Number: DI-PACK-82384
AMSC Number: N10325
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20220614
Limitation: None
GIDEP Applicable: No
Project Number: PACK-2022-010

Use/relationship: This Data Item Description (DID) specifies the content and format for submitting the Specialized Reusable Container Design Drawings.

Requirements:

1. Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

MIL-STD-31000 Department of Defense Standard Practice Technical Data Packages.

(Copies of this document are available online at https://quicksearch.dla.mil.)

ASME Y14.100 Engineering Drawing Practices.

(Copies of this document are available online at https://www.asme.org.)

2. Content. A Product Level TDP shall be delivered for the government-approved specialized reusable container design candidate. The TDP shall include engineering analysis and fully defined product definition. At a minimum, each TDP shall include the following data elements:

a. Parts list
b. Material construction and surface finish of item
c. Item fragility factor (G's) in shipping/non-operational mode
d. Mounting or hard points
e. Special shipping requirements, e.g. attitude, electrostatic discharge sensitivity, protection against emitting or receiving electromagnetic forces, corrosion, controlled temperature, etc.
f. Physical characteristics (length, width, height, weight, fragility, center of gravity, moments of inertia, lifting features, etc.)
g. Identification and modeling of specialized handling or support equipment needed for installation or removal, as applicable
h. Finite element analysis (FEA) or calculations
i. Part numbers and, if applicable, serial numbers

Check the source to verify that this is the current version before use.

j. Text documents (narrative or procedural info, as applicable)
k. Specifications

3. Format. TDP deliverable format is Native 3D models, 3D neutral files (STEP) and 3Di pdf for each TDP. Contractor shall confirm all neutral files are compatible with the following formats: IGES format (.igs, .iges) and STEP format (.stp, .step). 3Di formatting shall address title block, parts list, notes per ASME Y14.100 series of standards and MIL-STD-31000. Refer to MIL-STD-31000 Appendix B for 3Di sample PDF format. Product Drawings/Models and Associated Lists in Native Format shall be in accordance with MIL-STD-31000 paragraph 5.4.1.3. Company standards are not approved; all standards specified shall be industry and/or military standards.

End of DI-PACK-82384
