Data Item Description

TITLE: SOFTWARE METRICS

Number: DI-SESS-82410
AMSC Number: N10394
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20230608
Limitation: N/A
GIDEP Applicable: N/A
Project Number: SESS-2023-012

Use/Relationship: Software metrics provides the status of the software effort on an acquisition program and is used by the software development lead to manage resources and execution on a software development effort.

This Data Item Description (DID) contains the format, content, and intended use for the data product resulting from the work task described in the contract Statement of Work/Performance Work Statement.

Requirements:

1. Referenced documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

1.1. Standard Work Package SWP4940-024 Software Measurement Plan Template

2. Format. The deliverable shall be in contractor format unless tailored out in the Contract Data Requirements List (CDRL) (DD 1423).

3. Contents. Metrics shall be evaluated as part of the software engineering processes applied. These metrics shall be tailored, when appropriate, to reflect the scope of the software change, and be in compliance with NAVAIR SWP 4140-024. These metrics shall ensure software quality, maturity, and stability does not negatively deviate from demonstrated performance thresholds.

3.1. Document Management. This section shall identify the version, release date, and other relevant management and configuration control information associated with the current version of the deliverable. A change history, highlighting significant changes from version to version shall be included.

3.2. Table of Contents**.** This section shall index all sections, major paragraphs, subparagraphs and appendices with page numbers.

3.3. Scope. This section shall be divided into paragraphs system overview and document overview.

Check the source to verify that this is the current version before use.

3.3.1. System Overview. This section shall briefly state the purpose of the system to which this deliverable applies. It shall describe the general nature of the system and software; summarize the history of system development, operation, and maintenance; identify the project sponsor, acquirer, user, developer, and support agencies; identify current and planned operating sites; and list other relevant documents.

3.3.2. Document Overview. This section shall summarize the purpose and contents of the deliverable and shall describe any security or privacy considerations associated with its use.

3.4. Software staffing.

3.5. Software size (planned vs. actual or delta size report).

3.6. Build Release Indicators. This metric is for reporting functionality change based upon incremental builds. Each build will contain the final content as directed by the Government.

3.7. Software Defects/Discrepancies.

3.8. Test Progress Indicators.

3.9. System/Software Stability.
