DATA ITEM DESCRIPTION

Title: SERVICE ACTION REVIEW BOARD (SARB) ANALYSIS REPORT

Number: DI-SESS-82419
AMSC Number: N10436
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20231027
Limitation: N/A
GIDEP Applicable: N/A
Project Number: SESS-2023-033

Use/Relationship: The SARB Analysis Report will provide an analysis for all safety, maintenance, and operations-related documents applicable to aircraft.

This Data Item Description (DID) contains the format, content, and intended use information for the data product resulting from the work task described in the contract SOW.

Requirements:

1. Reference Documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. Format. The Report shall be in the Contractor's format.

3. Content.

    3.1. The Report shall contain the following information:

        3.1.1. Title of Airworthiness Directive, Service Action, or related document.

        3.1.2. Contractor document number and revision.

        3.1.3. Contract number.

        3.1.4. Corporate name and address.

        3.1.5. Signature block(s) showing corporate release approval.

        3.1.6. Source of documentation (e.g., FAA, Contractor, Aircraft Manufacturer, and Component Manufacturer) and documentation identification.

    3.2. Summary of the issue affecting the aircraft, aircraft subsystem, component, or support equipment and the issue resolution defined by the AD, SA, or related document.

    3.3. Detailed information on the effects of the inspection/repair/modification on performance, durability, part obsolescence, form, fit, function, installation and interchangeability.

Check the source to verify that this is the current version before use.

3.4. SA effectivity information on affected aircraft; landing gear; engines and APUs; air stairs; hardware part number changes associated with software changes; and Peculiar Support Equipment (PSE).

3.5. Compliance requirements (e.g., recommended, mandatory) and compliance time.

3.6. Related and concurrent ADs and SAs.

3.7. FAA Notices of Proposed Rulemaking (NPRM).

3.8. Recommended incorporation disposition (e.g., Incorporate, Attrition, Information Only, Incorporate in Long Range Plan, etc.), including category code for CFM engine SAs.

3.9. Disposition and incorporation histories of previous document revisions for the aircraft.

3.10. Recommended maintenance level of incorporation (Field or Depot).

3.11. List of all affected manuals relating to the maintenance and operation of the aircraft.

3.12. Identification and definition of Maintenance Task Cards defining changes to the aircraft maintenance program.

3.13. Specific parts, kits, spares, tools, and support equipment.

3.14. Rough Order of Magnitude (ROM) effort to accomplish the SA, including kits, parts, and consumable material costs; number of man-hours for installation, including access (open/close) and any other undefined time requirements in the SA; and requirements for special tools.

3.15. Warranty availability (if applicable), including parts and labor reimbursement.

3.16. For CFMI SB's spare parts categories 5-9 the contractor provided analysis report must include a brief explanation of the SB, the SB category, and a recommendation.

3.17. For the analysis and recommendation of each SA the Contractor shall include (if provided in the SB):

3.17.1. A description of the applicable equipment, item with Part Numbers, including associated firmware and software;

Check the source to verify that this is the current version before use.

3.17.2. A description of the service action(s) required, impacts related to the equipment or item, Next Higher Assembly(ies) (NHAs), and associated end items including firmware and software, and interchangeability;

3.17.3. For companies that Boeing has authorization to forward service actions, provide a copy of the associated service action; document and publication;

3.17.4. Recommendations related to previous and potential maintenance decisions, configuration modifications and operational changes;

3.17.5. Impacts to continued airworthiness;

3.17.6. Impacts to Extended Twin Engine Operational Performance Standards (ETOPS) Configuration Management and Procedure (CMP).

3.17.7. Impacts to obsolescence;

3.17.8. Equipment or item pricing and kit pricing with anticipated lead times (as applicable and when available in the Service Action);

3.17.9. Warranty information, when applicable, inclusive of warranty start date and end date warranty;

3.17.10. Aircraft, engine, aircraft component effectivities;

3.17.11. Associated labor hours (as applicable and when available in the Service Action);

3.17.12. A list of related SAs;

3.17.13. Failure rates (e.g., MTBF, MTBUR) on affected parts and assemblies (if available).

End of DI-SESS-82419
