DATA ITEM DESCRIPTION

Title: AGING AIRPLANE INSPECTIONS AND RECORDS REVIEWS REPORT

Number: DI-SESS-82422
AMSC Number: N10439
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20231027
Limitation: N/A
GIDEP Applicable: N/A
Project Number: SESS-2023-036

Use/Relationship: Paragraph 1105 of Part 121 of Title 14 of the Code of Federal Regulations (CFR) defines reporting requirements to the Federal Aviation Administration (FAA) for records reviews of aging airplanes. The purpose of this report is to maintain a cumulative record of repairs and alterations on aircraft to support FAA reporting requirements.

This Data Item Description (DID) contains the format and content for the data product resulting from the work task specified in the contract.

Requirements:

1. Reference documents. NOTE: Any applicable updates or changes to 14 CFR, §121.1105 (d) shall apply to this report and be incorporated at the next revision/ update. Any updates or changes to 14 CFR, §121.1105 (d) that result in cost changes will be addressed under a contract modification.

2. Format. Contractor format is acceptable.

3. Content. The report shall contain the following information related to the program:

    3.1. Report title.

    3.2. Report number, revision, and date.

    3.3. Revision record.

    3.4. Contract number.

    3.5. Corporate name and address.

    3.6. Signature block(s) showing corporate release approval.

    3.7. Security classification.

    3.8. Distribution statement.

    3.9. Destruction notice.

3.10. Data content as defined in the Code of Federal Regulations, Title 14 (14 CFR) §121.1105 (d), items (i) through (x), shall be provided for each aircraft in the fleet from the date of delivery for each aircraft. These data points are:

3.10.1. Total years in service of the airplane;

3.10.2. Total time in service of the airframe;

3.10.3. Total flight cycles of the airframe;

3.10.4. Date of the last inspection and records review required by this section;

3.10.5. Current status of life-limited parts of the airframe;

3.10.6. Time since the last overhaul of all structural components required to be overhauled on a specific time basis;

3.10.7. Current inspection status of the airplane, including the time since the last inspection required by the inspection program under which the airplane is maintained;

3.10.8. Current status of applicable airworthiness directives, including the date and methods of compliance, and if the airworthiness directive involves recurring action, the time and date when the next action is required.

3.10.9. A list of major structural alterations; and

3.10.10. A report of major structural repairs and the current inspection status for those repairs.

End of DI-SESS-82422
