Data Item Description

Title: TEST PROGRESS REPORT

Number: DI-SESS-82425
AMSC Number: N10443
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20231030
Limitation: N/A
GIDEP Applicable: N/A
Project Number: SESS-2023-040

Use/Relationship: The Test Progress Report outlines progress in achieving performance objectives at every level of testing on systems or equipment. It provides the procuring activity with the test progress status.

This Data Item Description (DID) contains the format, content, and intended use for the data product resulting from the work task described in the contract Statement of Work/Performance Work Statement.

Requirements:

1. Reference documents**.** The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. Format. Contractor Format.

3. Contents. The Test Progress Report shall be organized into the following sections:

3.1. Scope. This section shall be divided into the following sub-sections:

3.1.1. Test Articles.

3.1.1.1. All test articles with a schedule and list of tests including test sequence, and status for each test in tabular form.

3.1.2. Status Report.

3.1.2.1. Description of each test and all significant data obtained.

3.1.2.2. Detail of test results, conclusions, reinforcements, modifications and necessary changes to test assets.

3.1.2.3. Spectrum progress at the time of report.

3.1.2.4. Design conditions and maximum loads attained.

Check the source to verify that this is the current version before use.

3.1.2.5. Modifications to test articles: all modifications to the test articles to permit attainment of test loads, not previously covered in the description of test articles report, shall be described, including photographs and sketches as appropriate.

3.1.2.6. Test summaries consisting of supplemental pages, including a discussion of test results, conclusions, discussion of compliance with specification requirements, deficiencies disclosed, reinforcements, the flight or production articles in which reinforcements will or will not be incorporated, the effect of the test on the test program, flight program, evaluation of the weapons system, and delivery of the aircraft.

3.1.2.7. Significant achievements: the attainment of significant achievements, goals, or milestones during the static test program.

3.1.3. Test Failures.

3.1.3.1. Identification of test article.

3.1.3.2. Description of failure and point of origin of damage.

3.1.3.3. Test article repair details including schedule information such as cycling time lost for repairs.

3.1.3.4. Time of test failure in terms of flight hours, landings, or pressurizations demonstrated.

3.1.4. Inspection Data.

3.1.4.1. Identification of test article.

3.1.4.2. Recommended inspection period.

3.1.4.3. Urgency for inspection.

3.1.4.4. Man hours to inspect.

3.1.4.5. Inspection Techniques, access information, and recommended nondestructive testing methods if other than visual inspection is required.

3.1.4.6. Recommend repair, rework, or replacement procedures.
