DATA ITEM DESCRIPTION

Title: DATA MANAGEMENT PLAN

Number: DI-SESS-82448
AMSC Number: N10484
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20240628
Limitation: N/A
GIDEP Applicable N/A
Project Number: SESS-2024-035

Use/relationship: The Data Management Plan (DMP) describes the organization's processes, procedures, and controls within the DM program. The principal use is to provide the Government a basis for review, evaluation, and monitoring of the DM program and associated future workings.

This DID contains the format, content, and intended use information for the data product resulting from the work task described in GEIA-859 and the principles of GEIA-859-HB (Copies of these standards are available online at www.sae.org or from SAE International, 400 Commonwealth Drive, Warrendale, PA 15096-0001, Tel 877-606-7323 [inside USA and Canada] or 724-776-4970 [outside USA]).:

Requirements:

1. Reference Documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. Format. The Data Management Plan shall be in contractor's format unless otherwise specified in the contract.

3. Content. The DMP shall identify the processes and procedures for:

3.1. Data management and planning over the life cycle of a product.

3.1.1. Identify Configuration Status Accounting/Integrated Digital Environment (IDE) tools.

3.1.2. Data security and access processes/permissions.

3.1.3. Data retention.

3.1.4. Data protection and storage.

3.1.5. Physical Handling and Electronic Media (*transportation/delivery of media/receipt and storage).

3.2. Data identification throughout the product lifecycle:

3.2.1. Data classifications (Class/CUI).

Check the source to verify that this is the current version before use.

3.2.2. Unique data document part number assignments.

3.2.3. Data assertion rights.

3.2.4. Digital Model Data.

3.2.5. Data markings.

3.3. Data management encompasses record control and documentation of the product record and its metadata information to the product's end of life:

3.3.1. Digital Model Data version control.

3.3.2. Change management control processes.

3.3.3. Quality Assurance procedures

3.4. Establish and maintain a management process for intellectual property, proprietary information, sensitive data, and data rights.

3.5. Validation of record information establishment and maintenance in the execution of the total data from inception to disposal.

End of DI-SESS-82448
