Use/Relationship: The Software Metrics Report provides essential information on the software development for the system. This DID is used to track the progress of the software development.

This DID contains the format, content, and intended use information for the data product resulting from the work task described in the contract Contractual Engineering Task (CET).

Requirements:

1. Reference Documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

1.1. NAVAIRINST 5234.5B.

1.2. SWP4940-024.

2. Format. Contractor's format is acceptable.

3. Content. The following shall be included in the Software Metrics Report:

3.1. The Software Metrics Report shall include the following:

3.1.1. SW Cost (EVSPI, BCWS, BCWP, and Actual).

3.1.2. SW Size (Planned versus actual, new, modified, reused).

3.1.3. Staffing (planned versus actual baseline, current, and unplanned losses).

3.1.4. SW Requirements Volatility (planned versus actual, added, modified, deleted, total requirements).

3.1.5. Peer Review Defects (major, minor, and admin for SRS, ICD, IDD, SDD, STP, and cumulative).

3.1.6. SW Defects (priority per IEEE 12207 Appendix J).
