MILITARY SPECIFICATION

MODIFICATION AND MARKING PROCEDURES FOR TEST EQUIPMENT IN AEROSPACE VEHICLES (CLASS II MODIFICATION)

This amendment forms a part of Military Specification MIL-M-27733B(USAF), dated 30 November 1982, and is approved for use by the Department of the Air Force, and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 2

3.2.1, delete and substitute:

3.2.3 Master power switch. A master power switch accessible to the pilot shall be installed to de-energize at one time all test equipment and instrumentation installed in conjunction with a Class II modification, except for that required for safe operation of the aircraft or service drone. The swithch shall be identified by a plate, finished in black, which has orange borders and white-filled lettering. It shall be engraved as follows: “CLASS II MODIFICATION EQUIPMENT MASTER SWITCH".

PAGE 3

3.3.3.1, 8th line, delete “(see 6.4.3)”.

3.3.5.2, delete and substitute:

“3.3.5.2 Group A and B components (such as cameras, inverters, junction boxes, amplifiers, control boxes, recorders, and test equipment) shall be identified by a modification label which shall be orange in color (see figures 3 and 4).”

PAGE 4

3.3.5.2.1, delete and substitute:

"3.3.5.2.1 Where space is limited, the words "ITEMS”, “MOD #“, etc., may be left off the label, and just the information entered. The shortened label shall be orange in color (see figure 4)"

Figure 3, 6th line, delete "(DD Form 365A)" and substitute “(DD Form 365-1)”.

Figure 3, title, delete and substitute:

"FIGURE 3. Sample of typical components identification label.”

Figure 4, title, delete and substitute:

“FIGURE 4. Sample of typical components identification label - limited space
