* 4.5.4: Delete in its entirety and substitute the following:

"4.5.4 Propellant weight of case, cartridge alternate method. Acceptance shall be in accordance with the Government approved Statistical Process Control (SPC) Management Plan. Initial studies will be made to determine the capabilities of the propellant loading process. A Cp and Cpk of 1.33 or greater shall be verified using the approved SPC Management Plan. Once an acceptable Cp and Cpk are obtained, a minimum of three (3) consecutive samples shall be used to maintain control charts for each weighing station at each machine, and samples shall be taken in accordance with the approved SPC Management Plan. If the process goes out of control, production will cease. Necessary corrective action will be taken. If correction cannot be made, use original method."
