COMMERCIAL ITEM DESCRIPTION

MILK, EVAPORATED

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Federal Specification C-M-371 and specifications contained in Agricultural Stabilization and Conservation Service Announcements for evaporated milk.

This Commercial Item Description (CID) covers evaporated milk suitable for use by the Federal Government.

Salient characteristics.

A. Types.

The evaporated milk shall be of the following types as specified in the contract or purchase order. The Department of Defense packing and packaging requirements are contained in the section "For Department of Defense procurement." found on page 3.

Types.

Type I - Evaporated Milk
Type II - Evaporated Milk with added Vitamin A

B. Finished product description.

The evaporated milk shall possess a sweet, pleasing, and desirable flavor with not more than a definite cooked flavor. It shall be free from scorched, oxidized, or other objectionable tastes and odors. The product shall comply with the composition requirements specified in 21 CFR 131.130.

The evaporated milk shall be stabilized and of medium viscosity with a uniform consistency and appearance. It shall be smooth and free from fat or protein separation, lumps, clots, gel formation, coarse milk solids precipitate or sedimentation, and extraneous material.

The product shall possess a uniform natural white to light-cream color.

FSC 8910

The interior walls of the container shall not show excessive burn-on of product. Burn-on occurs during the heating process when milk becomes fused to the container surfaces. When burn-on is greater than 75 percent of the container surface, it is considered excessive. The cans shall be free from leakers, rust, and other evidence of improper processing and storage.

Unless otherwise specified, the age of product at time of delivery shall not exceed 60 days after packaging.

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; and has a national or regional distribution from storage facilities located within the United States, its territories, or possessions. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal requirements and regulations relating to the preparation, packaging, packing, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

The product shall be manufactured in a plant approved by the Dairy Grading Section, Dairy Grading and Standardization Branch, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture (USDA). When required in the contract or purchase order, the quality assurance of the evaporated milk shall be determined by USDA. The product shall be examined and/or tested in accordance with the applicable provisions in the CID and, when applicable, the United States Standards of Condition of Food Containers currently in effect on the date of solicitation and in accordance with the requirements in the applicable regulations.

Preservation, packaging, packing, labeling, and marking.

The evaporated milk shall be preserved, packaged, packed, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the contract or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurement.

The following requirements are applicable when specified by the contracting officer:

A. Commercial packaging. Twelve or thirteen fluid ounces of evaporated milk shall be packaged in a metal can in accordance with good commercial practice.

B. Commercial packing. Forty-eight cans of product shall be packed in containers complying with Uniform Freight Classification or National Motor Freight Classification, as applicable, except metal fasteners shall not be used in the final closure of the box.

C. Commercial unit loads. Shipping containers shall be arranged in unit loads in accordance with Type III, Class G of MIL-L-35078. When unit loads are strapped, the strapping shall be limited to nonmetallic strapping. The load may also be bonded with stretch or shrink film in accordance with MIL-STD-147.

D. Labeling. Labeling of cans shall be in accordance with good commercial practice and be in compliance with the Federal Food, Drug, and Cosmetic Act and the regulations promulgated thereunder.

E. Marking. Commercial markings for shipping containers are acceptable, provided the following information is included:

National Stock Number
Item Description
Quantity, Unit of Issue
Date of Pack (Month/Year)
Contract Number
Name, Address, and Zip Code of Contractor
Inspection/Test Date

Notes.

Purchasers shall specify:

- Labeling requirements, if different from good commercial practice.
- Type of evaporated milk.
- If USDA is to perform an acceptance inspection.
- If USDA is to perform a condition of container inspection.
