COMMERCIAL ITEM DESCRIPTION

BAKING SODA (SODIUM BICARBONATE)

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Federal Specification EE-B-86.

This Commercial Item Description (CID) covers baking soda, packed in commercially acceptable containers, suitable for use by the Federal Government.

Salient characteristics.

Baking soda shall comply with the Food Chemicals Codex as to quality and purity for sodium bicarbonate. Ninety-eight percent, by weight, of product shall pass through a U.S. Standard No. 80 sieve and at least sixty percent, by weight, shall be retained on a U.S. Standard No. 325 sieve.

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packing, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

FSC 8950

DISTRIBUTION STATEMENT A. Approved for public release; distribution is limited.

Quality assurance.

When the solicitation, contract, or purchase order requires that product quality and/or acceptability be determined, the Processed Products Branch (PPB), Fruit and Vegetable Division, Agricultural Marketing Service (AMS), U.S. Department of Agriculture (USDA), shall be the certifying activity and shall make the determination in accordance with applicable PPB procedures. The product shall be examined and/or analyzed in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers.

Analytical testing.

The certifying activity (Processed Products Branch) may authorize the Commodities Scientific Support Division, AMS, USDA, to perform analytical testing of the product for determination of conformance with the analytical requirements contained in this document using the specified laboratory procedures.

Preservation, packaging, packing, labeling, and marking.

The baking soda shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements.

The following requirements are applicable when specified by the contracting officer.

A. Commercial packaging. One pound of baking soda shall be packaged in a paperboard box in accordance with commercial practice.

B. Commercial packing. Twenty-four 1-pound packages of product shall be packed in a fiberboard shipping container complying with the Uniform Freight Classification or National Motor Freight Classification, as applicable, except metal fasteners shall not be used in the final closure of the shipping containers.

C. Export packaging. One pound of baking soda shall be packaged in a paperboard box in accordance with commercial practice.

D. Export packing. Twenty-four 1-pound packages of product shall be packed into a snug-fitting, fiberboard shipping container, constructed, closed, and reinforced in accordance with Style RSC, Grade W5c or W5s of PPP-B-636. Each shipping container shall have the contents enclosed in a waterproof case liner, fabricated and sealed in accordance with MIL-L-10547 for subsistence items. Exposed metal fasteners on the inside of each shipping container shall be covered with pressure-sensitive tape or paperboard pads. Reinforcement shall be restricted to nonmetallic strapping or pressure-sensitive adhesive, filament-reinforced tape in accordance with the appendix of PPP-B-636.

E. Unit loads (commercial and export). Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078. When unit loads are strapped, the strapping shall be limited to nonmetallic strapping.

F. Labeling (commercial and export). Commercial labeling shall be acceptable.

G. Marking (commercial and export). Marking of shipping containers and unit loads shall be in accordance with MIL-STD-129.

Notes.
