MIL-E-7080B
AMENDMENT -3
29 APRIL 1968

Superseding
Interim Amendment -2 (AS)
2 January 1968

MILITARY SPECIFICATION

ELECTRIC EQUIPMENT, AIRCRAFT, SELECTION AND INSTALLATION OF

This amendment forms a part of Military Specification MIL-E-7080B, 6 June 1962, and is mandatory for use by all Departments and Agencies of the Department of Defense.

Page 2, paragraph 2.1: Under Military Standards add:

"MS33645 Receptacle Installation, Fuel Nozzle Grounding
"MS90298 Connector, Receptacle Electrical - Fuel, Nozzle Jumper Plug
"MS90362 Receptacle, External Electric Power, Aircraft, 115/200 Volt, 400 CPS"

Page 3, paragraph 2.1: Under Air Force - Navy Aeronautical Standards delete references to AN3117 and AND10439..

Page 5:

(a) Paragraph 3.1.8.3.1: Delete, and substitute:

"3.1.8.3.1 Static ground.- When specified, provisions shall be made for the discharge of accumulated charges of static electricity by bringing the aircraft to ground potential on landing, and thus preventing shock to personnel and damage to the aircraft by controlling the point of discharge. The static grounding device shall be so installed as to be bonded to the aircraft structure and shall provide electric contact with the ground on landing. The device shall be adjustable or replaceable to compensate for normal wear, and shall not protrude from the aircraft during flight, except on landing and takeoff, if retractable landing gear is employed."

(b) Paragraph 3.1.8.3.2: In the third line delete "AN3117" and substitute "MS90298". In the fifth line delete "AND10439" and substitute "MS33645".-

Page 6: Add as new paragraphs:

"3.1.8.7.10 Electric connectors.- Connectors shall be selected so that contacts on the "live" or "hot" side of the connection are socket type, rather than pin type, to minimize personnel hazard and to prevent accidental shorting of live circuits when the contactor is unmated."
